FEDERATION OF STUDENTS MEETS HERE THIS WEEK

Twenty-five Colleges Are Represented at Conference; University Student Council Host to Delegates

MEETING ENDS TOMORROW

Faculty Members And Students Are on Program For Two Day Meet

Problems pertaining to student activities in college are to be the topic of discussion at the Southern Federation of College Students convention which is being held today and tomorrow at the University of Kentucky. The conference was held at Washington and Lee University last year.

The student council of the university is host to the visiting delegates. The Southern Federation of College Students is composed of the student councils and similar bodies of Southern colleges and has for its purpose the discussion of student problems and the betterment of the educational standards of southern schools.

Registration and assignments will mark the opening, at which time Kenneth Durham, president of the federation will call the meeting to order. The Rev. A. R. Perkins, Methodist student pastor of the University of Kentucky, will deliver the invocation. Dean Charles J. Turck, of the College of Law and president elect of Centre College, will deliver the welcoming address, which will be followed by the speakers on the morning program, including Dean Charles J. Turck who will talk on "Rules and Tradition," Colonel H. B. Hobbs, in charge of the R. O. T. C. unit at the University of Kentucky on "Educational Advantages of the Reserve Officers Training Corps," and Prof. T. T. Bryant.

TURCK CHOSEN TO HEAD CENTRE

Dean of College of Law Accepts Presidency of Boyle County Institution; Takes Office in September

WAS UNANIMOUS CHOICE

Charles J. Turck, dean of the College of Law, was unanimously chosen president of Centre College, at a meeting of the board of trustees of that school, held Friday afternoon, April 15. Two hours after he was chosen, a committee, headed by J. C. W. Beckham, met Dean Turck at the Lafayette hotel, where he accepted the presidency of the college.

The committee was composed of twelve members of the Centre board of directors. So anxious were the people of Danville that Dean Turck accept the position, that several prominent business men of the town accompanied the committee to Lexington. Dean Turck has submitted his resignation as head of the Law School.

Band Concert

May 1 Set As Date for Next Entertainment

The university band, directed by Prof. Elmer G. Sulzer of the music department, will give a concert Sunday, May 1. The last appearance of the band this year will be at a concert to be given during the latter part of May, shortly before Commencement.

This year the department of music has been giving a series of concerts throughout the winter months. The university orchestra, directed by Professor Lampert, and the band, directed by Professor Sulzer, have alternated in presenting the programs, each giving one program every month.

"Didn't She Look Sweet?," i. e. the Co-ed Dressed Up for Easter

Kernel Feature Writer Opines That She Most Decidedly Did But Then She Should Have: Campus Men "Say It With Flowers" and Spend Their Holidays in Town

(By ALFRED P. ROBERTSON)

She certainly looked sweet, didn't she? Meaning Kentucky's co-ed all dressed up for Easter. A vision of loveliness from her jaunty hat to her tiny shoes, her usual charm enhanced by a new creation that in some cases approached a sensation—she certainly did look sweet. And those flowers at her waist added the finishing touch.

We think the use of that word touch rather good. It was a "touch" all around. Her old man was touched for the clothes and her young man for the flowers. If the young man was a collegian it was usually also the finishing touch. Now you know why so many Kentucky men spent their holidays in Lexington.

Heartless custom, that of giving flowers on Easter. We do not know who began it but we would like to know. We have already poured down

CANDIDATES FOR MAY DAY HONORS

Miss Charley Smith

Miss Henrietta Blackburn

Miss Martha Minihan

Miss Louise Simpson

Miss Mattie Baxter

Miss Lorena Weber

Miss Virginia Reeves

Miss Carolyn Bascom

Eight Co-Eds Are Nominated For May Queen; Election Will Be Held Next Wednesday And Ceremonies May 6

Nominations for May Queen closed Tuesday afternoon at 4 o'clock with eight co-eds as candidates. Election will be held Wednesday, April 27. Ballot boxes will be in conspicuous places on the campus and poles will be open from 9 to 4 o'clock. Every male student in the university is entitled to one vote.

The candidate receiving the largest number of votes is declared May Queen. The second highest is Maid of Honor and the four candidates receiving the next highest number of votes are the Queen's attendants. The nominees are Misses Martha Minihan, Virginia Reeves, Mattie Baxter, Lorena Weber, Henrietta Blackburn, Louise Simpson, Charley Smith and Carolyn Bascom.

To enable students to know who are running and their qualifications, The Kernel with the cooperation of SuKy circle is printing herewith pictures of the eight candidates for the coveted honor together with a short sketch of their achievements in college. The candidates, their classes, scholastic standings for the past semester, home towns and achievements are as follows:

Martha Minihan—Lexington, sophomore, standing 2.4, glee club, battalion sponsor, society editor The Kernel, Su-Ky, Chi Delta Phi pledge, Kentucky favorite, and staff of Kentuckian.

Virginia Reeves—standing 1.6,

sophomore, Delta Delta Delta, Y. W. C. A., Kentucky favorite, Romany staff.

Mattie Baxter, Harrodsburg, junior, Alpha Xi Delta, standing 1.2.

Lorena Weber, standing 1.4, Louisville, senior, Zeta Tau Alpha, vice-president Women's Student Government, agricultural club, Administrative council, Executive Council Home Economics club.

Henrietta Blackburn—Lebanon, sophomore, Chi Omega, Philosophian, Stroller '26, lead in stroller play '27, Kentucky favorite, Glee club '26, Y. W. C. A., standing 1.5.

Louise Simpson—Nicholasville, standing 1.5, sophomore, Alpha Delta Theta, Y. W. C. A.

Charley Smith—Owenton, standing 1.1, Junior, Alpha Gamma Delta, Philosophian, Company sponsor '25, band sponsor '26, '27; Woman's Administrative council, secretary W. S. G. A. '25, president W. S. G. A. '27, Ziegfeld beauty '26, Kernel reporter '26, vice-president sophomore class '26, chairman Little Sister Movement '26, English club, Stroller eligible, president Alpha Gamma Delta '26.

Carolyn Bascom—Sharpsburg, Senior, Kappa Kappa Gamma, member Pan Hellenic '25, president Pan Hellenic '26, SuKy, Y. W. C. A. Sub Cabinet, president English club, W. S. G. A. council, secretary W. S. G. A. '24, president Kappa Kappa Gamma '26-'27, standing 1.3.

Y. W. DELEGATES TO MEET HERE

Conference Program Includes Addresses by Prominent Speakers, Discussions, Play, Social Events

SELECT NEW ADVISORS

The annual state conference of the Young Women's Christian Association will be held at the University of Kentucky on April 29, 30, and May 1. Several national Y. W. C. A. officers are expected here for the conference.

This conference promises to be one of the most successful meetings that has been held here. A hearty cooperation between the various parts of Kentucky has been shown and delegates from Kentucky Wesleyan, Berea, Eastern Kentucky Normal Teachers College, Moorehead Normal, University of Louisville, Hamilton College, Transylvania, and other schools will be present. The delegates will stay at Boyd hall during the conference.

Miss Katherine Butler, National

Photograph May Day

Kinograms Will Record Annual University Celebration

Kinograms, a national news reel company, will have one of its photographers in Lexington on May 6 to take pictures of the May Day festivities of the university, according to Earl H. Payne, manager of the Kentucky theater.

Kentucky's May Day exercises are known to the people of central Kentucky and each year hundreds of persons from surrounding towns come to Lexington to attend the ceremonies. It is expected that the various events on the program this year will prove even more brilliant than those of former years.

The presence of a news reel man at the ceremonies indicated that Kentucky's May Day is rapidly becoming more than an affair of local importance.

U. K. PROFS AT K. E. A. MEETING

President McVey, Deans Boyd, Taylor and Wiest, and Others Appear on Program at Conference

MUSICIANS HEAR LAMPERT

The Kentucky Educational Association, which is holding its annual meeting in Louisville this week, is well represented by faculty members of the university.

President Frank L. McVey delivered an address before the general session of the association at the Columbia auditorium this morning at 10:30 o'clock. His subject was "Weep No More My Lady." The reports of the various committees will be made on Saturday morning. Dean W. S. Taylor, of the College of Education is chairman of the research committee, and Professor Wellington Patrick, of the department of university extension, is chairman of the publicity committee of the association.

Thursday afternoon Dean W. S. Taylor was the leader in the round table discussion of "Recent Efforts in Educational Adaptation" held by the department of colleges and normal schools of the general association. Dean Paul P. Boyd, of the College of Arts and Sciences, was this morning, the leader in another round table discussion of "Education by Participation," held by the same department of the association.

Professor Jesse E. Adams, of the College of Education, will talk this

(CONTINUED ON PAGE EIGHT)

MUSIC DEGREE IS TO BE OFFERED

Total of 130.3 Credits, Which Must Include Class and Private Work, Is Required for Course

GRADUATES TO GET B. S.

A complete four year musical course, with a bachelor of science degree in music will be offered by the University of Kentucky music department, according to recent announcements from Professor Carl Lampert, head of the music department, and Professor Elmer G. Sulzer, band director. The purpose of the new course is to provide new musical leadership in the state and to give a purely cultural course for those students who desire it.

The music department is prepared to offer courses in elementary harmony, sight reading, public school music, history of music, and music appreciation. Instruction in piano, voice, and orchestra music will also be given. Professor Lampert will direct students who desire to play woodwind, brass or percussion instruments. A new member will be added to the faculty of the music department although he has not yet been selected.

A total of 130.3 credits is required for graduation. Each candidate for a degree must have one private and one class lesson every week, as well as two hours daily practice, throughout the entire four years. In addition, all students must be members of one of the musical ensemble groups on the campus.

Romany Rehearsals

Well Under Way for New Production

The second Romany play, "Sister Beatrice," will be given in the Romany Theater the first week of May, and rehearsals are now under way. "Sister Beatrice" is a religious play which closely resembles the "Miracle." The leading role, that of the Virgin, is taken by Miss Dunster Duncan Foster, managing director of the Romany. The part of the priest is portrayed by Prof. Cotton Noe, and the other parts are taken by university students and Lexington patrons. Rehearsals are being held every night in the Romany and the production promises to be highly successful. "Sister Beatrice" is the most difficult play that Romany players have ever attempted and it's outcome is eagerly awaited by the patrons and enthusiasts of the Little Theater movement.

Valade Heads "Y"

University Association Elects Officers for Coming Year

Ray Valade, of Detroit, was elected president of the University Y. M. C. A. in the election held last week. Other officers elected were: Penrose Ecton, vice-president; Virgil Couch, secretary; Harvey Stone, treasurer.

The new officers begin their term May 1 and will succeed the former officers: Frank Melton, president; John R. Bullock, vice-president; James May, secretary; and Titus Fenn, treasurer.

On May 6, 7, and 8 members of the new and old cabinets of every school in the state will hold a conference at Camp Daniel Boone on the Kentucky river to work out plans for the coming year. This conference is held under the auspices of the state Y. M. C. A.

LARGE NUMBER ENJOY BANQUET

Students and Lexington Business Men Hear Sir George Paish Speak at Meeting of Commerce Club

HELD AT PHOENIX HOTEL

A large number of commerce students and faculty of the university and also several prominent business men of Lexington met in the ballroom of the Phoenix hotel at 6:30 o'clock Tuesday evening to enjoy the annual banquet of the Commerce Club. These banquets, which are held each year, are for the purpose of bringing the commerce students into closer union with the business men of the city.

The club was fortunate in having as a guest Sir George Paish, noted lecturer and scholar, who spoke at the university convocation at 10 o'clock Tuesday morning. Sir George delivered a brief address on "Can America Maintain Her Position as World Banker and Trader." Dean Wiest, of the Commerce College, took as his subject "Cooperation Between the Board of Commerce and the College of Commerce." In this talk Dean Wiest stressed cooperation in every way and made it plain to those present that where there was to be harmony all factors must work together, for the good of all.

An interesting feature of the evening was the address given by Mr. C. N. Manning, Lexington business man who has shown much interest in the

Notre Dame Invades Blue Grass For Game Saturday

Close Entries
Plans Made for Intramural Tennis and Baseball

M. E. Potter, director of intramural athletics, announces that the entry lists for intra-mural tennis will close Saturday, April 23, promptly. Play is expected to begin on or about April 28. The only ones barred from competition in this meet are men who have won their letters in tennis.

The entry list in the diamond ball competition will close promptly on the 23 of April. All fraternities wishing to compete are urged to get their men in immediately, as no entries will be taken after Saturday.

ELEVEN MAKE PERFECT GRADES

Students in Arts and Sciences College With Standing of Three for First Semester Are Announced

SEVEN GIRLS ARE ON LIST

Eleven students in the College of Arts and Sciences made a standing of three for the first semester, according to an announcement made this week by Dean Boyd's office. Of this number seven were girls and four were boys.

Arranged in classes five of the students making all A's for the past semester were seniors; two, Juniors; three, sophomores; and one was a freshman. There were two less students in the Arts and Sciences college to make straight A's than for the first semester of last year, but two more than for the second semester of the 1925-26 term when but nine students had an unblemished record.

The names of the students making a perfect standing last semester, as announced by the dean's office are as follows:

Seniors—Llewellyn Mae Jones, Fulton; Mrs. Marguerite B. Coakley,

Keys and Mystic 13 Hold Annual Pledging

Ten Most Outstanding Freshmen and Thirteen Prominent Sophomores Are Chosen

Keys, honorary sophomore fraternity, and Mystic Thirteen, honorary junior fraternity, of the University of Kentucky, held their annual pledging Wednesday evening, April 13, at the Keys and Thirteen dance.

Keys attempted to select as its pledges the ten most outstanding freshmen on the campus. Those pledged were: H. M. Fitch, C. W. Combs, Stanley Milward, R. W. McIntosh, E. M. Butler, A. B. Gorman, Don Whitehead, J. N. Elliott and Irvine Jeffries.

Members of the active chapter are: J. A. Tapscott, E. C. Knadler, Claire Dees, Elmer Gilp, Egbert Marshall, W. L. Heizer, H. L. Green, H. A. Pieh and Beverly Waddell.

Mystic Thirteen selected as its pledges the thirteen most outstanding sophomores on the campus. The pledges are: Messrs. Frank Nelson, Roland Eddy, Louis Cox, Waller Jones, Thomas Walters, Claire Dees, Roy Kavanaugh, Major Wigglesworth, Henry Maddox, William Kinney, Egbert Marshall, Beverly Waddell, Elmer Gibb.

Members of the active chapter are: Messrs. Paul Jenkins, Leroy Miles, Oscar Stoesser, Richard McIntosh, William Gess, Jr., Stanley Stagg, Gayle Mohny, Louis Root, Ray Ellis, Ray Schulte, John Bullock.

May Day, With Certain Reforms in Elections, Looms in the Offing

Kentucky, Disregarding the Conventions, Sets Date as May 6; Political Rings in Election of Queen Have Replaced Old "Ring-Around-the-Maypole" on Modern Campus

(By KATHLEEN PEFFLEY)

Along with April showers and term papers comes that established custom of old Kentucky known as May Day. The place relegated for May Day has always been May 1, but us collegians with our oft quoted disregard for the conventional, we take stories in such periodicals as "College Humor" for our authority in this statement—have decided to have it on May 6 as it will do just as well and will be lots more convenient.

The may pole dance idea has been discarded as being incompatible with our bored collegiate dignity. But in its place we have substituted an institution which tho' less naive and wholesome perhaps, has in it certain elements of chance and determined effort which was entirely lacking in the old "ring-around-a-May pole" sort of thing.

All our May Day excitement is involved in the choice of May queen.

VISITING TEAM IS REPORTED TO BE VERY STRONG

Wildcats Have Been Inactive Since Return From Distasteful Southern Trip; Lose All Games

FORMER LINEUP SHIFTED

Captain Ericson to Play First Base; Blasingame Will Be on Second

(By WARREN A. PRICE)

Kentucky vs. Notre Dame; nine rounds; tomorrow afternoon on the home lot in Stok field. The game will start at 3:00, that is, if Jupiter Pluvius does not add a few more inches of water to the present supply.

The highly touted Notre Dame aggregation will come to Lexington with the strongest presentation of baseball ability that has been seen in the local yard for many moons, and probably the strongest that will appear in Lexington this year. The Irish have met with very merited success on the diamond this year, eliminating most all northern opponents, and scoring what few Southern teams they had on their schedule, with the exception of the University of Georgia. After losing one game to the Hoosiers, the Georgians came back the next day and beat Notre Dame's star hurler, Walsh, by a healthy score.

Because of the interference by inclement weather, the Wildcats have

(CONTINUED ON PAGE EIGHT)

ENGINEERS LEAVE ON ANNUAL TRIP

Forty Juniors Go North and Twenty-six Go South on Inspection Tour of Large Plants

ARE TO RETURN MAY 1

The seventh annual junior inspection trip of the College of Engineering will be held next week, part of the class going north and part south. The southern trip will begin Sunday, April 24, and will end May 1, under the supervision of Professors C. S. Crouse and L. C. Robinson.

The juniors will make their first stop in Chattanooga, Tenn., where they will visit Lookout Mountain on Sunday, and then will go to Muscle Shoals by special pullman on Monday morning where they will visit the nitrate plants and the Wilson dam there. They will leave Monday afternoon on a special coach for Birmingham, Ala. The group will divide Tuesday morning, part of them will go to the iron mines and part to the American Cast Iron Pipe Company. The entire party will visit the Fairfield plant of the Tennessee Coal Iron Railway Company. Wednesday morning.

(CONTINUED ON PAGE EIGHT)

Melcher on Trip

Dean of Men Goes to Convention at Atlanta

Dean C. R. Melcher left Wednesday night for Atlanta, Ga., to attend the ninth annual Middle West Convention of Deans of Men, April 20-23.

Dean Melcher, who was president of the conference last year, is on the program this year to speak on "Student Employment."

Floyd Field, dean of men at Georgia Tech, is president of the conference this year.

That statement, on the face of it, is surprisingly simple; but all sorts of complications and disappointments are incurred in the course of a vigorous campaign. Long and tedious has been the evolution by which winning damsels have been given the honor of a crown on the first of May. The childish ceremony of presenting the blushing village belle with a wreath of scented clover is a thing of the past. The modern campus system is a more or less involved political machine. Campaign managers and publicity experts work for weeks in advance extolling the virtues of their particular candidates. In the past, many years ago before the latest of systems came into fashion, the campus was a Tammany Hall in miniature. Now our youthful reformists have vigorously labored to take the excitement out of the May Day campaign.

ALUMNI EDITORIALS

THE ANNUAL MEETING

It was announced in the last issue of The Kernel that the annual meeting of the Alumni Association will be held this year on Saturday, May 28. An interesting program is in the process of formation and things have been planned that will find favor with all those who attend the meeting.

An effort is being made this year to get a larger number of Alumni back to the campus than in years gone by. The commencement program ties in so conveniently with the annual meeting that three most enjoyable days can be spent in Lexington. The program is being so arranged that there will be a minimum of group meetings. With the exception of the business meeting which will be held Saturday morning and which probably will be followed by a group luncheon at which the Senior class will be welcomed into the association, the most of the time will be left with the Alumni to do with as they will most enjoy.

Those of you graduates and former students who have not been back to the campus for several years will be most agreeably surprised at the progress that has been made. Coming back at the last of May and the first of June when the campus is its loveliest you will marvel at the way the campus has been improved in a very short time. Even those of you who have been here in recent years will see many changes for the better.

University of Kentucky Alumni are loyal and hold an even greater love for their Alma Mater than most other universities and there is no reason why we cannot have just as many, if not more, back home at this time of times in the university and college year.

A warm and hearty welcome will await you.

YOUR VOTE

Within the next few days each active Alumni of the University of Kentucky will receive a ballot bearing the names of the men and women who have been nominated to guide the destiny of your Association for another year. The committee which was named to prepare two sets of nominees have done what they consider the best thing for the Association and have placed on this ballot the names of men and women whom they deem capable and interested enough to work for the ultimate benefit of the Association and the University of Kentucky.

Each of you is interested in the Association and have evidenced your interest by the fact that you have been a member of the Association for the past year and many of you for years in the past. You have the interest of your Alma Mater at heart and are anxious to see her forge ahead as anything pertaining to Kentucky should do.

Each one of you has a preference as far as the nominated candidates are concerned; there is some reason why you think that one or the other nominee would be better for the office. It is your duty to the Association to voice this preference by voting for the best one and returning the ballot promptly. Ballots received after May 23 will not be counted.

The fact that you are an active member in the Association has earned you the right to a voice in the management and work of the Association. If you fail to return your ballot properly voted and signed you are not exercising the right that you have paid for. If you fail to do your part in this it is your fault if the affairs are mismanaged and neglected.

FIRST BOARD OF TRUSTEES NAMED

Original Charter of Agricultural and Mechanical College Is Approved on April 23, 1880

NORMAL SCHOOL IS BEGUN
(CHAPTER VI, Continued)

I had counted on the active opposition of the denominational colleges and of a large number of their religionists in the General Assembly, but I had not anticipated and was not prepared for the active and energetic and bitter opposition which the tax encountered from the agriculturists and from the grange organizations which represented them. They did not want an institution which might grow into a university. They wanted an agricultural college pure and simple, with blacksmith and carpenter shops attached. They wanted no mechanical arts which might develop into technical schools, no scientific studies other than the most meager outlines of agricultural botany and other subjects directly related to farming. For the maintenance of an agricultural college, the agriculturists thought that the annual income from the congressional land script fund was sufficient. More would only seduce the management of the college to establish courses of study for liberal education, and for this the denominational college already existing could supply all that the state required. This unreasonable, obstinate hostility was even more difficult to overcome than the opposition of the colleges. Clardy and Green and Bird and Logan and Hanna were not men to be readily convinced by argument nor won over by diplomatic tact. A propaganda of more than twenty years was required for an acquiescent support of state aid for scientific agriculture. The fruits of this missionary work you witness today. Where formerly they bitterly opposed the appropriation of hundreds, they now readily vote thousands, for instruction in agriculture, and where, with difficulty, we could get a dozen or a score of students in agriculture, the college of agriculture now vies with all the others in the number of its matriculates.

Dozens and scores of the leaders lived to repent the part which they had taken and to congratulate the college on the success which it had, under providence, achieved.

The late Ho. Cassius M. Clay was kind enough to say, in a public address which he made in 1909, that the great achievement of my life was the education of the people of Kentucky into the conviction that it is the duty of the state to make adequate provision for higher education. This accomplished, all else logically follows. But though the battle was won, the fruits of victory were not easily retained. In every General Assembly from 1883 to 1890, opposition to the continuance of the tax existed and motions to repeal were introduced, committees of investigation were appointed. The college was harassed and annoyed and required to show its passports at every turn.

I cannot enumerate the names of the staunch adherents who stood by the issue during its struggle for existence. A few, however, might be noted: Richard A. Spurr, senator from Fayette county; James H. Mulligan, representative of the City of Lexington; W. C. Owens, of Scott county; Offutt of Bourbon; Thomas G. Stewart and Rodney Haggard of Winchester; Captain James A. Hindman, of Adair; Lieutenant-Governor and Mrs. Cantrill; Governor Blackburn; Godfrey Hunter, of Burkesville; Laban T. Moore, of Boyd; D. D. Sublett, of Magoffin; and of the Newspapers of the Commonwealth: the Courier-Journal, of Louisville; The Lexington Daily Press, and the Danville Advocate gave the college an undeviating and hearty support.

Chapter VII
The original charter of the college, approved April 23, 1880, named a Board of Trustees as follows: William B. Kinkead, Lexington; Judge B. J. Peters, Mt. Sterling; William H. Wadsworth, Maysville; and Preston H. Leslie, of Monroe county, who

South C. street, Kansas City, Kans. 1910

Clement Francis Kelley is an attorney with offices in the Northern Bank building, Lexington, Ky.

Chester Arthur Kuebler is vice president and general sales manager of the Duro Pump and Manufacturing Company of Dayton, Ohio. His address is 420 Volusia avenue.

Ben Harrison Logan is sales engineer for the Imperial Electric Company and lives at 1583 Glenmount avenue, Akron, Ohio.

Robert Alexander Lowry is salesman for the Miller Supply Company in Logan, W. Va.

Caleb Wallace Marshall is a foreman for the American Bridge Company of Gary, Ind.

Sarah Rossetter Marshall, (Mrs. Thomas J. Wertenbaker) is living at 111 Fitz-Randolph Road, Princeton, New Jersey.

William Eugene Mosby is a building contractor and lives at 812 Cottage Grove avenue, Chicago, Ill.

George Riley Pope is an attorney and is located in Harlan, Ky.

Shelby Post is an engineering contractor and is located in Winston-Salem, N. C.

Ralph Detwiler Quickel is with the Davis Coal and Coke Company, and has offices in the Land Title building, Philadelphia, Pennsylvania.

CALENDAR

Chicago Alumni Club, luncheon third Monday in each month in the Men's Grill, Marshall Field Co.

Louisville Alumni Club, luncheon, private dining room Brown hotel 1 o'clock p. m., first Saturday in each month.

OPTIMIST CLUB HONORS ALUMNI

Edward Dabney '20, and James Park '15, Are Incoming and Outgoing Presidents of Organization

PARK IS GIVEN WATCH

The members of the Lexington Optimists Club honored two graduates of the University of Kentucky at a recent meeting, when Edward S. Dabney, was elected president of the club and James Park, retiring president was presented a handsome white gold watch engraved with the Optimist emblem, as a token of appreciation from the members of the club.

Edward Dabney was graduated from the College of Law of the University of Kentucky with the class of 1920 and now is associated with the legal department of the Security Trust Company of Lexington. He served last year as vice-president of the Optimist Club and was nominated on both tickets and elected as head of the organization by a unanimous vote. He was installed at the last meeting.

James Park was graduated from the College of Law with the class of 1915 and now is president of the Alumni Association and county attorney for Fayette county.

The Optimist Club of Lexington is one of the most active luncheon clubs in the city and is made up for a large part of young business and professional men.

should hold office until January 10, 1882; James R. Robinson, Lexington; Judge B. F. Buckner, Lexington; John G. Simrall, Louisville, and General Don Carlos Buell, Muhlenberg, who should hold office until January 10, 1884; Major Robert S. Bullock, Lexington; L. J. Bradford, Covington; Judge A. R. Boone, Mayfield, and Major Phillip P. Johnston, Lexington, who should hold office until January 19, 1886, or until their successors were appointed and qualified.

Without prejudice to any members of the board appointed thereafter until the present time, it may truthfully be said that the first Board of Trustees comprised a body of men admirably fitted by training and experience to give the Agricultural and Mechanical College, whose administration and control were committed to them, all the advantages which a patriotic citizenship could confer. But one of these namely, Major Phillip P. Johnston, still survives. All the others have long since gone to their reward.

Section 8 of the original charter provided that a normal department or a course of instruction for irregular periods, designed more particular-

ALUMNI LOST LIST

The Alumni office would appreciate it if you would send into this office addresses of any of the graduates listed below.

Helen Louise Jeager, '04 (Mrs. Carl G. Ramsdell)

Frank H. Darnall, '05

Ernest James Murphy, '05

Grover Cleveland Mills, '11

Mary Irene Hughes, '12

Harry George Korphage, '12

Joseph Millett Lewis, '12

Walton Perkins, '12

William Abithal Wallace, '12

BALLOTS TO BE SENT OUT SOON

Two Tickets of Officers and Executive Committee Members Have Been Nominated by Committee

TIME LIMIT ESTABLISHED

Ballots bearing the nominees for the different officers of the Alumni Association will be mailed out to every member who is in good standing, within the next week. They will bear the names of candidates who have been nominated by a committee of Alumni for the offices of president, vice president, secretary-treasurer and members of the executive committee.

According to the constitution of the Alumni Association of the University of Kentucky the ballots must be voted and returned to this office no later than five days preceding the annual meeting of the Association. The date for the meeting this year is May 28 making the limit for returning the ballots May 23.

Owing to the resignation of some of the members of the executive committee only two members will be left with unexpired terms this year. Since the constitution calls for a membership of six, it will be necessary for four to be elected. Two to hold office for three years and two to hold office for two years. The terms of the hold-overs will expire in one more year.

Eight candidates have been nominated as possible members of the executive committee from which number four members are to be elected. Each alumnus should vote for four candidates for executive committee-men. The two receiving the largest number of votes will hold office for three years and the two next in line will hold office for two years. In this way the elections again will come in the manner prescribed by the constitution. Each member normally is elected for a three year term.

The other officers will be elected as usual.

It is necessary for the ballots to be returned on time as they will not be counted if they arrive after May 23.

CAMPUS VISITORS

Carl Franklin "Midge" Stith, who was graduated with the class of 1924 and who now is located in Miami, Fla., where he is the proprietor of a drug store, was a visitor on the campus last week. He is in Kentucky to spend the summer.

Jasper Reed McClure, a member of the class of 1925 and who lives in Bellevue, Ky., was a visitor at the Pi Kappa Alpha house last week.

ly, but not exclusively, to qualify teachers for common and other schools, shall be established in connection with the college, and those students who attain the requisite proficiency as teacher in the opinion of the academic board, shall be furnished by the college with a certificate to that effect, setting forth in such cases the various branches in which the student is qualified, and such certificate shall be evidence of qualification to teach in the public schools of the state in the various branches named without further examination.

SOCIETY NOTES

CALENDAR

Friday, April 22

The annual Junior Prom at the men's gymnasium from 9 until 1 o'clock.

Saturday, April 23

Zeta Tau Alpha tea dance at Patterson Hall from 3:30 until 6 o'clock.
Phi Delta Theta formal dance at the Phoenix hotel from 9 until 12 o'clock.

Founder's Day Banquet

Alpha Xi Delta sorority of the University of Kentucky celebrated their annual Founder's day Saturday evening, April 9, with a banquet at 6:30 o'clock in the ballroom of the Phoenix hotel.

Pink roses were the artistic table decorations. The lighted fraternity shield hung in the far end of the room.

Miss Rowena Noe presided charmingly as toastmistress. The delightful response toasts were as follows:

Miss Mildred Green "Pansy"
Freshman Miss Mary Brown Bradley "Violet"
Sophomore Miss Ruth Ligon "Lily"
Junior Miss Ruth Ligon "Heliotrope"
Senior Miss Geraldine Cosby "Rose"

Collegiate Dress Shoppe
Opposite

And Caps, Too!

The assortment of Knapp-Felt headwear includes not only a wide variety of smart hats, but also caps exquisitely tailored from exclusive wools from the leading mills of England and Scotland. Every headwear need is served in the Knapp-Felt line and all uniformly high grade.

R. S. THORPE & SONS

—Incorporated—

MAIN AND MILL STREETS

at the convention held here from

April 14-17.

The social program for the convention was as follows:

Thursday night, Stunt night was held at the Phoenix hotel.

Friday afternoon, Miss Magdalene Rogers entertained with a tea at her home from 5 until 6 o'clock.

The dining room was attractively decorated with yellow tulips and lighted yellow candles, and Easter lilies and hydrangea blossoms were used throughout the house.

Receiving with the hostess, Miss Rogers, were: Mrs. S. L. Slovers, national president; Mrs. T. T. Ellsworth, providence deputy; Miss Pearl Bonnisteele, national treasurer; Mrs. William Lehman, alliance president; Miss Maria Dudley Hume.

About 150 guests were present for the affair.

Friday night a model initiation was held at Hamilton College.

Saturday was spent in sightseeing, and the various historic points of the Blue Grass were visited.

Saturday evening a banquet at the Phoenix hotel closed the convention. The ballroom was transformed into a picturesque Spanish garden, with colored awnings over the windows, containing window boxes of ferns and flowers.

In the center of the room a garden plot was formed, around which the tables were arranged. Fiesta lights in silver, gold and blue, the sorority colors, were hung across the garden. Spring blossoms added to the attractiveness of the scene.

Blooming pansy plants in Bybee pottery jars were the pretty favors given.

The programs which were made of gold paper with the three deltas in blue were in the form of Spanish combs and read as follows:

Phoenix Hotel
Lexington, Ky.
16 de Abril, 1927

Banquet
Delta Delta Delta
Compte De Frutas
Apio Escogido Galletas Aceitunas
Pollo Asado
Palatas con Queso
Quesantes Panceillas Cafe
Ensalada de Tomates Tellenos
Gallitas
Helada De Naranja
Ballos

Vine de Plata Delta Phi
Vine de Ora Chi
Vine de Azul Delta Eta
Crema de Menta

Following the program a Spanish serenade was given by Miss Marie Beckner, Miss Mabel C. Graham and Miss Billie Whitlow, who wore attractive Spanish costumes.

Two hundred and fifteen guests were present.

Commerce Banquet
The members of the Commerce club and the commerce students of the university met in the ballroom of the Phoenix hotel Tuesday evening at 6:30 o'clock for a "get-together" banquet.

Interesting talks were made by Sir George Paish, who spoke at the convocation Tuesday morning; Dean Weist, head of the Commerce College; Mr. C. N. Manning, President McVey and LeRoy Miles.

The menu was as follows:
Minted Grape Fruit Cocktail
Celery Hearts, Wafers, Mixed Olives
Roast Spring Chicken
Mushroom Sauce
New Potatoes, Parsley Butter
Asparagus Tips, Hollandaise
Rolls
Coffee
Stuffed Tomato Salad, Mayonnaise
Waters
Ice Cream, Crushed Strawberries
Cake

Monday afternoon, at 3:30 o'clock, the child study group of the American Association of University Women met with Mrs. O. T. Koppus, at her home at 1427 Nicholasville pike.

Mrs. William S. Taylor lead the discussion.

The Kernel wishes to apologize for any inconvenience which may have been caused by the announcement of the marriage of Mr. Travis Million and Miss Katherine Garret which was announced in the last issue of the paper. The article was inserted without the knowledge of the society editor.

Ithaca, N. Y.

Dance by Keys and Mystic Thirteen

The Keys and Mystic Thirteen, honorary sophomore and junior fraternities of the University of Kentucky, entertained with a formal dance in the university gymnasium from 9 until 1 o'clock Wednesday evening, April 13.

The illuminated shields of the two fraternities decorated the ballroom and the Rhythm Kings orchestra played for the dancing. Each fraternity held a pledging service during the dance, the Keys between the second and third "no-break" numbers and the Mystic Thirteen between the fourth and fifth. After each there was a dance for the members and pledges only.

The hosts were assisted in entertaining by the chaperones, President and Mrs. McVey, Prof. and Mrs. Enoch Grehan, Captain and Mrs. James Taylor, Dr. and Mrs. W. D. Funkhouser, Dean Sarah Blanding, Miss Margaret McLaughlin.

The members of the active chapter of the Mystic Thirteen are Messrs. Paul Jenkins, Leroy Miles, Oscar Stoesser, Richard McIntosh, William Gess, Jr., Stanley Stagg, Gayle Mohney, Louis Root, Ray Ellis, Ray Schulte, John Bullock.

The pledges are: Messrs. Frank Nelson, Roland Eddy, Louis Cox, Walter Jones, Thomas Walters, Claire Dees, Roy Kavanaugh, Major Wigglesworth, Henry Maddox, William Kenney, Egbert Marshall, Beverly Waddell, Elmer Gibb.

Active members of Keys are: J. A. Tappscott, E. C. Knader, Claire Dees, Elmer Gibb, Egbert Marshall, W. L. Heizer, H. L. Green, H. A. Pich and Beverly Waddell.

Pledges are: H. M. Fitch, C. W. Combs, Stanley Milward, R. W. McIntosh, E. M. Butler, A. B. Gorman, Don Whitehead, J. N. Elliott and Irvine Jeffries.

There were about five hundred guests present and the dance was one of the most delightful and interesting of the season.

Before the event the active chapter of the Mystic Thirteen entertained with a dinner in the Venetian room of the Canary Cottage for the young ladies whom they were escorting to the dance.

Spring Pledging Service
Phi Upsilon Omicron, honorary home economics sorority and Alpha Zeta and Block and Bridle, honorary agricultural fraternities of the University of Kentucky, held their spring pledging Friday evening at the pavilion of the College of Agriculture.

Mr. O. B. Jeffries, of the market department of the university, and Dean Thomas Cooper made interesting talks. Miss Mattie Kreylick gave a reading and Miss Josephine Frazer entertained with several vocal and banjo selections.

The pledges to Phi Upsilon Omicron were: Miss Mary Stuart Newman, Lexington; Miss Dora Mae Duncan, Fulton. The members of the active chapter are: Misses Sarah Curle, Josephine Skain, Catherine Brewer, Ann Becker, Elizabeth Aoron, Miriam Hyman, Gertrude Griffin, Mary Allen Steers, Irene Morgan.

The pledges to Alpha Zeta were: Messrs. Ralph Woods, Grant Maddox, James Walters, Hugo Hesson. The active chapter are: Messrs. Watson Armstrong, Lowry Caldwell, George Insko, H. B. Brown, W. O. Blackburn, Mr. Scott.

The pledges to Block and Bridle: Messrs. Grant Maddox, James Walters, Armon Berry, Perry Summers, N. J. Howard, Marion Garnett, B. F. Fontenberry. Members of the active chapter: Messrs. George Insko, Lowry Caldwell, H. C. Brown, W. O. Blackburn, Marion Goff, R. C. McClure, James Bondurant.

Delightful A. T. O. Dance
Alpha Tau Omega fraternity of the University of Kentucky, entertained brilliantly Saturday evening, April 9, from 9 until 12 o'clock with a formal dance in the ballroom of the Phoenix hotel.

Southern smiles and roses and the lighting effects in the fraternity colors of blue and gold were the decorations for the affair. The illuminated fraternity shield in the blue and gold lights hung in the far end of the room.

Attractive program booklets in tan leather, bearing the fraternity crest were given the guests. Six "no-break" dances were on the program. Lights were dimmed and an Alpha Tau Omega song was played during the special fraternity "no-break" dance. Music was furnished by the Greenland Cincinnati's orchestra. Four hundred guests were present.

The hosts, members of the active chapter, were:
Watson Armstrong, Raymond Auxier, James Augustus, Parham Baker, Ted Bullock, Harold Caplinger, John Dundon, Roland Eddie, James Ellis, Lloyd Ficken, Ernest Franklin, Arthur Pope, Paul Reed, Truman Rumberger, Paul Scott, Ralph Taylor, Wendell Warnock, Oscar Westendorp, William Zopf, Marcus Franklin, Marion Garnett, Hal Gingles, Wendell Hooe, Paul Jenkins, Edwin Knadler, John Lair, Earl May, Houston Myers, Frank Nelson, Carl Pigman.

And the pledges: Messrs J. Courtney Arnett, H. B. Myers, Andrew Tack, Harry Callaway, Hugh Adcock.

The chaperones were: Dr. and Mrs. Frank L. McVey, Dean and Mrs. P. P. Boyd, Dean and Mrs. Charles J. Turk, Miss Margaret McLaughlin, Dean Sarah Blanding.

VOCATIONAL GUIDANCE

ENGINEERING

Talk it Over With John Hays Hammond Through Esca G. Rodger

"Old fell, you look like a scrapper," you say softly.

You're sitting in the reception hall of John Hays Hammond's Washington home, staring back at an African lion that is cying you coldly. A magnificent beast! Dead? Well, yes, but you prefer him that way. And he's more than an effective floor covering. Though he's a dead lion, he's a living symbol—of strength, of courage, of the indomitable spirit of the engineer. Just what you'd expect to find in John Hays Hammond's hall.

"A fighter in far places, weren't you, old fellow?" you reflect as your eyes measure the animal's tawny length.

When, what lion! You estimate that if you were to lie down on him with the top of your head touching the base of his neck, your toes would just about touch the base of his tail. You'd like to try it. But you decide you won't. Suppose someone came and caught you at it?

A few minutes later as you're shaking hands with John Hays Hammond in a book-lined study that looks out over the tree tops, you realize if Mr. Hammond had found you measuring yourself on his lion, he would merely have chuckled. He's the understanding kind, this world-famous engineer who has breakfasted with workmen and dined with kings.

A man of great understanding, a man of great achievement, a man who has lived great adventures in rough, remote corners of the world—that's John Hays Hammond.

And he likes boys.

"Please sit down," he invites you.

"What is it you want to know?"

"All about engineering," you answer promptly, your twinkle meeting his. You know you're asking the impossible. Few men know so much as John Hays Hammond does about all kinds of engineering, but how can anything about the training and work and rewards of the civil engineer, the mining engineer, the mechanical engineer, the chemical engineer, the electrical engineer, the marine engineer, the military engineer?

The thing can't be done. You modify your request.

"I'd like to get a bird's-eye view of engineering," you say. "I'd like to learn ways of testing myself to find out if I'm the right sort to make an engineer; I'd like to know about the best kind of training; then I'd like to know something about openings in engineering, and about the future in it."

"One of the best ways of finding out if you have the right qualities for engineering is to talk with different men in the profession," Mr. Hammond suggests. "Men are glad to help a boy size up himself, and in a personal talk, a man can often learn enough about a boy so that he can give him advice that fits his special case."

"But here is some general advice that fits every boy's case. Don't go into engineering with the idea of getting rich quick—or of getting into something soft and easy. Feverish scrambling for big money isn't worth while—and an engineer's life isn't soft. It's a hard life, and a relatively short one. The successful engineer must be of pioneering caliber. He faces many hardships and runs grave risks in rough countries."

Grave risks. You remembered how narrowly Mr. Hammond himself escaped death in South Africa. Death by hanging! You have heard the story.

Back in 1890's Mr. Hammond became consulting engineer for some of the most important mining companies in South Africa. And he also became one of the four leaders in the Reform Movement in the Transvaal in those tumultuous days when Kruger was president of the Transvaal Republic. Although Mr. Hammond was not in sympathy with the Jameson Raid, he was arrested after it, along with the three other leaders in the Reform

FRATERNITY ROW

Miss Elizabeth Purcell, of Louisville, spent several days at the Alpha Gamma Delta house and attended the dance Wednesday evening.

Miss Hazel Hughes, who is attending Hamilton College, was a guest at the Alpha Delta Theta house last week-end.

Messrs. Ed Hasdin, Herbert Lother, Gordon Lilbridge, and Walter Jones, of Cincinnati, were guests at the Alpha Gamma Epsilon house last week-end.

Miss Sue Bascom, of Millersburg, spent the week-end at the Chi Omega house and attended the Keys-Thirteen dance Wednesday evening.

Miss Dora Edwards, of London, is a guest at the Alpha Xi house.

Mrs. Bruce Stevenson, of Circleville, Ohio, is the guest of her sister, Miss Margaret Averill at the Delta Delta Delta house.

Misses Marie Beckner, of Winchester; Elizabeth Lileston and Elizabeth Galskirk, of Paris, were guests at the Delta Delta Delta house last week-end and attended the convention.

Movement, and all were tried for

high treason.

They were tried before Gregorowski, "the hanging judge," imported from Orange Free State for the occasion because the Transvaal judges refused to sit. Gregorowski came boasting that he'd make short work of John Hays Hammond and his companions—came fore-handedly bringing his black cap with him.

The trial was a farce. Within a surprisingly short time, the death sentence was pronounced.

Immediately, Mr. Hammond and the other three leaders were conducted to the Pretoria prison and locked up in the death-cell. For twenty hours, the four were huddled together in that dark little cell, where they could hear plainly the pounding of the carpenters erecting the gallows outside.

But, though the condemned men could not know it, those twenty hours were bringing cablegrams of protest from all over the world. In the end, the death sentence was commuted to life imprisonment. Later, upon personal payment of a fine of \$125,000 each, Mr. Hammond and his fellow prisoners were released.

All this slips through your mind as off a rapidly running picture reel. Grave risks!

But John Hays Hammond, sitting opposite you in the sunny study so unlike that Transvaal death-cell, is evidently thinking of everyday risks, risks with a different sort of thrill but no less grave in the long run.

"If you're going into civil engineering or into mining engineering, you should have pretty good health," he tells you. "You'll be sleeping out doors, riding horseback, tramping over rough country, climbing up and down ladders, putting in long hours. You'll be handling all kinds of men. You may be exposed to tropical diseases. You may have to combat unsanitary conditions of living. You may be eating, frequently, all kinds of food, from poorly selected, poorly prepared food in camp to overrich, overabundant food at dinners and banquets that you, as a successful engineer, will be attending later. You are likely to be plunging into extremes of heat and cold—into Death Valley in summer; into a Montana blizzard in winter, as you fight your way through to some mine. You may get caught in snowslides and landslides and cave-ins. A hard life. You'll need good health."

Making Good Through Sheer Grit

"Yet," Mr. Hammond adds, "once in a while a man who is badly handicapped physically succeeds through

sheer grit in making exceptionally

good. One of the most outstanding engineers I've known was greatly handicapped because of the paralysis of one of his legs. Yet he won recognition as an expert. He made examinations for me in Mexico, in South America, and in many inaccessible parts of the world. He died before he reached middle age, but he had acquired a competency and high rank in his profession.

"The man who hasn't a strong physique must learn how to take care of himself. I wasn't particularly robust; yet I've survived a good many hardships. In spite of the dysentery contracted on the Zambezi river, malaria in Central America, and pneumonia in Utah, I am 'well preserved,' as I am told by kind friends; I ascribe this to the fact that most of my life has been spent in the open and that I have benefited by long horseback rides in many remote regions of the world, sleeping out at night, and being compelled to eat simple meals."

You seize the opening for the ques-

LOSERS ALL AROUND

Frankly we don't know who is the greater loser. Sometimes we think it is our own campus Apollos who are bereft of opportunities to gain fabulous fortunes; again moved by a spirit of compassion, we pity most First National Pictures who have cast aside a rare money-making opportunity; but most of all we feel sorry for the great American picture-going public who will not have the opportunity to enjoy the histrionic ability of some of the greatest potential players living in America.

Following that well-established rule of Postum "there's a reason," and the reason for this heavy loss to Kentucky students, the moving picture industry, and the American public lies in the announcement of the thirty-three colleges to be visited by representatives of First National Pictures and College Humor in an attempt to procure new and brilliant screen talent. Yes, unbelievable as it may appear, the University of Kentucky was not included in that list!

We'll admit that we were deceived. When College Humor announced that screen tests would be made and an opportunity given for college students to star in the movies, we hailed the announcement as a golden opportunity. Joyously we published the glad news in The Kernel and with our fellow-students eagerly awaited the publication of dates when the test would be made on our campus. Then followed our disillusionment.

Kentucky, noted for its fast horses, fair women, and good liquor; famed throughout all civilization for the beauties of its Blue Grass region; celebrated in literature and music for the Southern courtesy and hospitality of its Blue Grass inhabitants and as notorious in every corner of the globe for the feuds, superstitions, and folklore of its mountaineers. Kentucky, the historical; Kentucky, the beautiful; Kentucky, the picturesque; but Kentucky, slighted in this opportunity to gain fame for itself and to perform a real service for mankind.

As we attempt to write more willing tears blur the paper before us. Alas for those university students who for weeks have thought of little else but of the rare opportunity which awaited them along the cinema trail; alas for those fond parents who saw through their children a chance for undying fame and universal plaudits; alas for the university which hereby loses a chance for deserved recognition.

But we are unselfish. Sorry as we feel for our own students we pity more the picture industry and most of all the American public which must, in the final analysis, be deemed the greatest loser.

Life was ever thus.

MAY QUEEN ELECTION

In connection with general plans for making May Day this year the largest student celebration ever held at the university, SuKy circle this year has arranged a new system for the election of May Queen and her five attendants.

Nominations for May Queen closed Tuesday afternoon and the election is to be held on next Wednesday. In this issue appear pictures and short sketches of the various candidates for May Queen. SuKy and The Kernel are doing this in order to enable all men students to know what girls are running and their qualifications.

In past years following the election of May Queen there has always been some comment and dissension, and even the most uninterested of spectators could not fail to notice the great amount of "campus politics" which featured the annual inter-sorority struggle for supremacy.

But this year, PERHAPS, it will be different. At least every man student will have the opportunity to know ahead of time who are running, how they look, their scholastic standings, and their campus activities and achievements. Then if any student fails to vote or allows himself to be led to vote for someone merely because he is asked to vote for her, it will be no one's fault but his own. Thus advance indications are that campus politics will be conspicuous by its scarcity next Wednesday.

Kentucky has long been noted (according to its poets) for its beautiful women. We don't believe in bragging—but look over the pictures of the nominees for May Queen.

DEAN TURCK

With the announcement last Friday that Dean Charles J. Turck had accepted the presidency of Centre College, mingled joy and sadness have settled on the university campus—joy that such deserved advancement and recognition should come to the popular head of the university law school; sadness that the university should lose so capable and valuable an administrative officer.

It would be impossible to describe Dean Turck's service to the university. Coming here but three years ago, he entered upon his duties with enthusiasm that presaged the many triumphs of the law college under his three year regime. In these three years, the Law college has materially raised its standards, has acquired its own modern building, and has gained national recognition as one of the leading law schools of the country.

Nor was Dean Turck content with his service to the university. With the same zeal that he performed his university tasks he worked for community progress. A Rotarian, an elder in the Presbyterian church, a member of many organizations which sought to further the interests of city and state, Dean Turck was ever willing to sacrifice his own interests for others.

Perhaps even a greater testimonial to Dean Turck and his work at the university, however, is the esteem in which he is held by students of the university. Known by nearly every student on the campus, Dean Turck has the utmost respect and admiration of all. And in the Law college it would be difficult to find a student who did not have the dean as his ideal lawyer—quick, capable, courteous, and a perfect Southern gentleman.

The Kernel feels that the university has suffered a great loss in the dean's departure, but it congratulates Centre in procuring a man of Dean Turck's calibre as its head. And when Dean Turck assumes his new duties as head of the celebrated, old, nearby school, he will carry with him the sincere best wishes of the entire student body and faculty of the university.

WILL IT WORK?

Dean Melcher says it will. The university authorities think it will. Records show that in a majority of the institutions which have tried it, the plan has been successful. But never-the-less, following the announcement that next fall the university will inaugurate the custom of having freshman week just prior to the beginning of the fall session, considerable discussion has been aroused as to whether or not the plan will be successful here.

Theoretically, at least, freshman week should be of great value to university and incoming freshmen alike. It has often been said that matriculating in college is starting on an entirely new phase of life, and certainly such an important undertaking should be started off as well as possible.

If freshman week teaches freshmen something about the university they are entering, its ideals and ambitions; and enables them to discriminate between worthwhile and the wasteful elements of college life and to grasp something of the purpose of attending the university—if freshman week does this and in addition, makes the boy or girl "feel at home" and happy that he is a student here—then the plan will be successful and every student should be for it whole-heartedly.

But there is another side to the question. Freshman week can only be successful if students of the university do their part. During the period of freshman week all upper-classmen will be requested to stay off the campus, according to the committee which is making the plans for the week.

Undoubtedly, however, on sororities and more especially on fraternities, will fall a considerable responsibility in deciding whether or not the new venture will be a success. Rushing plans and policies will have to be considerably changed. The old system of "catch as catch can" will scarcely be applicable to the new order of things. On many other campuses fraternities have a gentlemen's agreement not to rush during the period of freshman week. Perhaps such a rule as this is not necessary. But every fraternity must realize that the university comes first and that in its rushing program it must not conflict with the university plans for freshman week.

In so much as most of the leading universities have freshman week certainly the plan should be tried and should be a success here. The Kernel is confident it will be a success and will be another milestone in the forward march of the university. The Kernel believes this because it is confident that students will do their part.

THIS AND THAT

Centre students elected Hyatt "King of the May" recently. Hyatt is the man who made that fatal touchdown against Kentucky last fall.

We elect no "King of May" but if any one of the girls running for "May Queen" has ever jilted a Centre man, we hope that she will admit the deed and give us a chance to elect her unanimously, thereby avenging ourselves.

There is, however, only one thing certain about this May Queen business and that is either a blonde, brunette or a red headed co-ed will be elected.

We hate to suggest it, but isn't it possible that it is "sax appeal" which makes an orchestra good?

If all the students who were glad to return to classes after the holidays were laid end to end, he would feel awful conspicuous.

Our government isn't so dumb. What if our marines were kept at home and some one suggested that they be sent to Chicago?

"An optimist," says one of our exchanges, "Is a student whose name begins with 'A' and he still thinks that he won't ever have to sit in the front row."

What about the fellow who gets himself a girl and still expects to make Phi Beta Kappa.

The most difficult thing to us about these honorary fraternities is learning the names of the outstanding men whom they pledged.

A college student is a person who pays for the privilege of attending classes and then chortles with glee when the prof fails to appear.

In all fairness to some of our profs we must say that they really have no favorites—they flunk everybody with equal grace.

Most college boys have ugly legs—others wear wear knickers.

And a majority of the latter wear three pair of woolen golf hose.

With Christmas, valentine day and Easter out of the way, we can't help but wonder what reason we can have for giving "her" a box of candy, as the merchants so consistently suggest.

RELIGIOUS DISCUSSION

THE MAJESTY AND GLORY OF CHRIST

Mark 9:2-10 and 2 Pet. 1:16-18

The Transfiguration of Christ marks a remarkable occurrence in his eventful life. Three of the Evangelists narrate that a few days after Peter's confession that he "was the Christ" Jesus took with him Peter, James and John and went up into a high mountain to pray.

It was a crisis in our Lord's ministry when this marvelous incident occurred. His popularity was diminishing and the tide of rejection had set in. Thereafter his steps brought him nearer the cross where ignominy and suffering awaited him.

In the habitations of the flesh Jesus had moved among the disciples but here in this upland solitude his regal splendor and majesty was asserted.

On Herman's brow we are in the realm of the supernatural. As the Sun bears its own testimony so here on Herman's height (the most conspicuous of Palestine's mountains) amidst the darkness of the night, he is clothed in garments that glisten while radiance that dazzle play upon his face. It is a witness to his "Kingship" for once, on earth, his appearance is what he really is—King of Kings and Lord of Lords.

The glory of the God-head broke through the concealment—a glorious out-burst of Divine effulgence. It irradiated his body. It diffused itself over his whole person. Beams of heavenly light flashing around them. That face so soon to be marred for the world's sake out-rivalled the radiance of the noon day sun.

The sacred penmen were lost for similitudes to express such supernatural glory and majesty. Matthew says "white as the light;" Mark says, "white as snow," while Luke says "flashing forth as lightning."

The privileged inner circle witnessed his glory. They had been present in the death chamber of the daughter of Jairus and they would accompany him in his Gethsemane while the law had said "in the mouth of two or three witnesses should anything be established."

It was not hallucination of which Peter wrote but a personal testimony based on a personal experience. Peter's testimony could not be a fabrication for he said "we saw," "we hear."

Two of Heaven's Ambassadors appeared to Jesus confirming his prophetic office "The redeemer of the world."

The subject discussed was not the creation of new worlds but the redemption of this one. Moses was the Law giver while Elijah was the fearless prophet. In their lives a very remarkable and singular circumstances had marked their earthly termination centuries before and now here on the mountain these illustrious and glorified saints attend the "transfigured" Christ, conversing of the most stupendous event in magnitude in the history of sinful humanity—"his decease at Jerusalem."

The voice from the cloud said "this is my beloved son." God was present but unseen. The Cloud was the symbol of his presence. Moses had seen the cloud in the mountain and God himself had said "no man can see my face and live" besides God purposed that these witnesses should behold the Glory of Jesus only.

This was transcendent commendation and the evidence was spiritually complete.

The vital lesson for us in this study is the assurance of immortality. Here is Divine confirmation for all time from the father of a future existence, consciously enjoyed by the redeemed, Jesus never sought to impress people by some irresistible display of supernatural power. This I think is another reason that so few witnessed his majesty.

In literature we have this testimony from Mr. Alexander in his "Burial of Moses."

"And had he not high honors?
The hill side for his pall.
To lie in state while Angels wait
With stars for tapers tall.
And the dark rock pines like tossing plumes
O'er his bier to wave
And God's own hand in that lonely land
To lay him in the grave."

"In that deep grave without a name
Whence his uncoffined clay
Shall break again oh 'wondrous sight'
Before the Judgment day
And stand with glory wrapped around
On the hills he never trod
And speak of the strife that won our life
With the incarnate Son of God."

Art gives us Raphael's most celebrated painting "The Transfiguration." It was not quite finished when he was stricken with fever and died. He requested that the painting be hung where he could see it and think of his Glorified Redeemer.

"The mount for Vision,—but below
The paths of daily duty go,
And nobler life therein shall own
The pattern on the mountain shown."

Co-eds Edit Issue of The Tar Heel
A very interesting and instructive edition of The Tar Heel, a newspaper published at the University of North Carolina, recently was edited by the U. N. C. co-eds. Some interesting facts about the co-eds were brought out. They are not allowed to enter until their junior year. It is claimed that they lend beauty, charm, and "sense of direction" to the drabness of the campus. By an exquisite effulgence of sweetness vicerunt, vicerunt.—Exchange.

ERECT SPANISH-AMERICAN HOUSE

Columbia University Builds a Center for the Study of Language and Literature of Spain

IS THIRD FOREIGN UNIT

A plan for the erection of a Spanish-American House at Columbia University was announced yesterday by Professor Frank Callcott of the department of romance languages, according to Professor Doyle, of the romance language department. The movement is under the direction of the Institute de las Espanas de Columbia, which aims to establish a common headquarters for its affiliated clubs, now numbering more than two hundred in twenty-eight states.

"We seek to provide in the United States, particularly in New York City under the auspices of Columbia University, a center for the study of the language and literature of Spain, Spanish-America, Portugal and Portuguese-America," Professor Callcott said. "The need for a center of Spanish culture is constantly becoming more manifest. In Columbia alone there are between 2,500 and 3,000 students of Spanish. In the high schools of New York City there are over 32,000 students of Spanish and besides these there are a large body of Spanish students in the private and parochial schools."

An Italian House is also being completed by Columbia University. This makes the third unit of the Foreign Language group to be constructed by the school. The Maison Francaise, the Casa de las Espanas and the Casa Italiana have all been erected for the furtherance of modern languages at Columbia. All students interested are invited to visit the building.

Romance languages is the only one that does not have suitable quarters at Columbia University. The Maison Francaise, situated near the Faculty Club, has long served as a center of French culture in this country. The Casa Italiana is now nearing completion, and its directors have generously offered us office space, but if the Institute is to fulfill its real mission, a suitable house, similar to those mentioned, and a sufficient endowment to maintain it, together with a small staff of paid assistants, are absolutely essential.

Shows Feature Films

It is universally conceded that Americans as a whole know very little about their own country. It was this idea in mind that the department of history at Yale presented to the students at the University of Maryland two instructive and historical pictures, "Jamestown" and "Dixie." These pictures are very accurate in detail and fact. To add to the realism of the picture the actress who plays the part of Pocahontas has to go bare-legged throughout the winter weeks of screening. She claims this was a hardship from which she never recovered.—Exchange.

A University of Maryland freshman, who was arrested for speeding after a football game, was released on his personal bond when he told the judge that he lost his shoes in the scramble between halves of the Maryland-Virginia football game and that he was hurrying home because his feet were cold.—Ex.

The average student and faculty member of Oberlin College, Ohio, is a bicyclist, and each dormitory and recitation hall has its bicycle racks, according to an Intercollegiate Press dispatch on unique college traditions.

Love may be blind, but the neighbors are not.—Satyr.

Moister Lather Smoother Shaves

WILLIAMS Shaving Cream works up fast into a rich bulky lather simply saturated with moisture. This super-moist, saturated lather soaks into the beard bristles until they are completely softened. That's why there is no razor "pull" with Williams, why all blades seem sharper. Williams leaves the face glove-smooth. Two sizes, 35c and 50c.

Williams Shaving Cream

To the man
who isn't
satisfied
with first
place

THE man who wins a race can't afford to get complacent over it. His next step is to improve on his own running time.

The electrical communication industry in America ranks first in the world, with exceptional facilities for research and constructive work.

But the men in this industry are never satisfied to let it go at that. No process, no matter how satisfactory, by whom devised or how well bulwarked by age, is here immune from challenge. This dynamic state of mind must appeal mightily to men who are pioneers at heart.

SPRING HAS COME!

Spring has come! That's all Akkie sings about and really, me, too. In this Squirrel Phude column or Skunk Phude article which the marvel of the ages, the Kampus Kat, calls it, we is a trifle late writing on that trite but substantial old phrase "in spring a co-ed's fancy lightly turns to thoughts of love." Course, all the other writers on the very best paper south of the Mason and Dixon line or in the old U. S. A. for that matter, have discussed and raved over the ecstasies which we term spring, but he who laughs last laughs best.

And all the love cases or puppy love affairs! You know, it's like measles of our dear childhood days, perfectly natural for this season of the year. And Akkie sez some of these love affairs are the queerest things. "What on earth does he see in her?" she'll ask.

And I'll answer, knowing this is the kind of an answer she wants, the "he" having been one of her old flames and it hurting her famous ego that he has strayed into foreign paths, "Goodness knows, I don't know. Perhaps it's her car."

So Akkie goes on the campus armed to the full, with the very best weapons any woman can use, clothes. Bah! The way she fixes up to go to class one would think she had an engagement with the Prince of Wales (which reminds me, I see he stayed on his last horse. Good boy!) Akkie is just determined spring shall not find her napping in spite of spring fever.

And speaking of spring fever, ain't it the most delightful sensation? Not to give a care whether you get to class or not, and not to ever open a book or worry about anything. Just to sit on the I Tappa Keg porch and dream with the warm southern breezes lulling you into sleep, sleep, sleep. Or perhaps, if you have enough energy you'll walk over to the Tavern for food or get an ice cream cone somewhere. One must eat even if it is spring.

"Oh, darn. What's that, the alarm clock? Seven o'clock! Well, I don't shut up! I'm up."

Yes, we have a first hour. There's no rest for the weary even if it is spring. We don't care whether we get to class or not but the point is nine-tenths of us do get there. Paragons! Most wonderful students in the world! Really, the university should award us all with medals.

Another poem the literary editor refused to publish:

Poem

The year's at the Spring;
The day's in the morn.
The sheep's in the meadow;

The cow's in the corn.

Sure her eyes they are raven:
And her hair it is curled.
And God's in His heaven
All's right with the world.

PREVIEWS OF LOCAL SHOWS

STRAND THEATER

"GETTING GERTIE'S GARTER"
The garter—thought passe in these days of rolled hosiery and no hosiery at all—has once more come into its own! For "Getting Gertie's Garter," the famous farce, has found its way into the film with Marie Prevost in the star role. It will be seen at the Strand Theater beginning on next Sunday.

The garter in this case is unique in that it is of gold and boasts a man's picture in a miniature frame which is part of its make-up. It is around this unusual hosiery accessory, and the frantic efforts of Charles Ray, featured leading man to obtain possession of the trinket, that the plot of the piece hinges.

E. Mason Hopper directed from a script by F. McGrew Willis. It is a screen version of Avery Hopwood's screamingly funny stage play. Prominent in the cast are Del Henderson, Harry Myers, Sally Rand, Fritz Ridgeway, Lila Leslie, Franklin Pangborn and William Orlamond.

"SPECIAL DELIVERY"

Eddie Cantor introduces a new version of the Three Musketeers in his latest Paramount comedy, "Special Delivery" which comes to the Strand Theater on Wednesday. Instead of the conventional trio of buddies who roll their way through the story in fulfillment of the motto "One for all and all for one" Cantor introduces a trio of public service musketeers, a fireman, a policeman and a postman, who are rivals in love and only run true to form when the object of their rivalry is in danger.

Eddie Cantor is the postman, a rookie letter carrier who blunders into all sorts of hilarious misadventures. Donald Keith is the fireman and Jack Dougherty the cop on the Beat. Jobyna Ralston is the girl for whose favors the three are constantly battling. William Powell, that smooth, suave villain of dramatic roles, is the common enemy against whom the three unite. Others in the cast are Victor Potel, Paul Kelly and Mary Carr.

BEN ALI THEATER

"HEY, HEY" COWBOY

"Hey, Hey! Cowboy," starring Hoot Gibson, will be the feature at the Ben Ali Theater Sunday.

"RISKY BUSINESS"

There was a time when the motion picture that didn't contain a fire, a wreck and an explosion could hardly lay claim to the title of film entertainment.

Vera Reynolds' latest starring vehicle, "Risky Business," which will be on view at the Ben Ali Theater next Monday, Tuesday and Wednesday, contains no fire and no wreck, but it does make use of an explosion; a very unspectacular one that is part of the contributing factors to the biggest, and most continuous explosions of mirth injected into a firm dramatic

offering for a long time. It's only a water heater that blows up, but the consequences—not written in maimed bodies or scalded faces, but in screamingly funny satire on the mishaps that occur in the best-kept households—are both comic and dramatic.

Alan Hale directed the picture, Kenneth Thomson, Ethel Clayton, Zasu Pitts, Ward Crane, Louis Nathaux, George Irving and Louise Cabo are in the cast.

Three acts of vodvil will complete the program.

KENTUCKY THEATER

"THE PERFECT SAP"

"The Perfect Sap," based on "Not Herbert," a successful Broadway stage play by Howard Irving Young, is the Kentucky's feature this weekend.

Ben Lyon will have the featured role in this picture, a comedy-melodrama packed with thrills and comedy situations.

Howard Higgin, who has turned out a string of highly successful pictures of late for the Robert Kane Productions, directed.

The combination of Higgin and Lyon has proved decidedly successful in the past in "The Great Deception," "The New Commandment," and "The Reckless Lady." Other pictures directed by Higgin include, "The Wilderness Woman," which is proving one of the big successes of the season.

"TIN HATS"

He's in the army again! For after all, Tom O'Brien wasn't killed in "The Big Parade," but has come back "bigger and better" than ever in Edward Sedgwick's production of "Tin Hats," the Metro-Goldwyn-Mayer picture opening at the Kentucky theater Sunday.

Tom plays the part of a top sergeant in the Army of Occupation in this comedy of post war days in Germany, which not only brings him back to life as a soldier, but gives him a promotion as well.

In "Tin Hats," Tom is a member of a cast that includes Claire Windsor, Conrad Nagel, Bert Roach and George Cooper. The story is an original by Sedgwick and the adaptation was done by Lew Lipton. Donald Lee wrote the continuity.

"VITAPHONE"

The Kentucky theater has installed Vitaphone at a cost of twenty-two thousand dollars, thus bringing to Lexington entertainment on a par with every city of equal size, and even matching that of New York, Chicago and Los Angeles.

The Kentucky theater has selected as its opening program on Vitaphone an Address by Will Hays, Roy Smek, the wizard of the strings, Mary Lewis, singing old Southern melodies and Martinella, New York Grand Opera star.

The Vitaphone features will be run in addition to the regular film program. "Tin Hats," a Metro-Goldwyn Picture featuring Conrad Nagel and Claire Windsor. It is a comedy of the Army of Occupation, filled to the brim with clever humor.

Vitaphone is sweeping the nation. In every city where it has been presented it has created an absolute sensation. The Kentucky theater is indeed proud to present this great attraction to the people of the Blue Grass.

Is This Education?

I can solve a quadratic equation, but I cannot keep my bank balance straight.

I can read Goethe's "Faust" in the original, but I cannot ask for a piece of bread in German.

I can name the kings on England since the War of the Roses, but I do not know the qualifications of the candidates in the coming election.

I know the economic theories of Malthus and Adam Smith, but I cannot live within my income.

I can recognize the "Leit-motif" of a Wagner Opera, but I cannot sing in tune.

I can explain the principles of hydraulics, but I cannot fix a leak in the kitchen faucet.

I can read the plays of Moliere in the original, but I cannot order a meal in French.

I have studied the psychology of James and Titchner, but I cannot control my own temper.

I can conjugate Latin verbs, but I cannot write legibly.

I can recite hundreds of lines of Shakespeare, but I do not know the Declaration of Independence, Lincoln's Gettysburg Address, or the Twenty-third Psalm.

—Journal of N. E. A.

WILL PUBLISH COLLEGE SONGS

Intercollegiate Book Will Be Off Press this Month; Over One Hundred Colleges Are Represented

KENTUCKY IS INCLUDED

For nearly two years representatives of more than one hundred of the foremost American universities have been cooperating in an effort to put together in one volume the official alma mater and principal football (or "fight") songs of the American universities. Thornton W. Allen (Washington and Lee), well known as the composer and publisher of college songs, has just announced that the new book has finally gone to press and will be ready for distribution this month. Over half of the edition has been subscribed for, and as this edition is limited the subscription committee is urging all those who desire copies to order them as early as possible. The orders will be filled as received until the edition is exhausted.

Every effort has been put forth to make this new volume as attractive as possible. In addition to the 256 pages of music printed on dull finished Oxford paper, there are sixteen pages of text matter and eight pages of illustrations (photographs of the largest and most important college stadiums in America). All of the paper is of ivory finish and the half-tone cuts are printed on heavy coated stock. The books are being bound in attractive olive green cloth with gold lettering. The special price of \$3.75 has been made on this first edition only.

Many of the songs are printed in this volume for the first time and also included are the greatest college song hits of record. Among the most popular football songs are included "The Golden Bear" (California), "As The Backs Go Tearing By" (Dartmouth), "The Brown Cheering Song," "Forward the White" (Bowdoin), "Arizona Grid March," "Lord Geoffrey Amherst," "Yea, Alabama," "Fight For The Glory of Carnegie," "Flag of Maroon" (Chicago), "Trombone Song" (C. C. N. Y.), "Roar, Lion, Roar" (Columbia), "The Big Red Team" (Cornell), "O Davidson," "Here's to the Man Who Wears the 'D'" (Drake), "Rambling Wreck of Georgia Tech," "Bullet Song" (Gettysburg), "Harvardians" (Illinois Loyalty), "Indiana, Our Indiana," "I'm a Jay-Hawk" (Kansas), "The Victors" (Michigan), "Northwestern Push on Song," "Hike Notre Dame," "Across the Field" (Ohio State), "Mighty

ENGLISH

"Collich" Vernacular Furnishes Theme for Feature Article in Ohio State Lantern

"Listen, cookie pusher, I wanna proposition you."

"Go ahead, parlor athlete."

"I got two doves lined up for after the game. Can you get the old man's chariot?"

"Nix, it costs a neat sheaf of lettuce to take out a couple of bims and I only got two rollers. Anyway, the pater's using his transportation and I'm booked for tonight with a swell blimp."

"Aw, you're a third strike."

"Tell you what, though—I can put you next to a babe what don't care if you got only Sunday School fare so long's you take her to a struggle."

"All right, see you at the game."

That, folks, is a conversation in the advanced, revised, latest, newest, etc., slang on the Ohio State University campus. It's "collich chatter" that needs interpretation to the uninitiated and here's the "lowdown" on the highspots in the late 1926 model of the mythical campus dictionary of slang.

A "cookie pusher" is a "parlor athlete."

And a "parlor athlete," necessarily is a "cookie pusher."

A "dove" is a co-ed, and she also may be a "bim," or a "blimp," or a "babe."

A "chariot" is an automobile which can also be a "buggy" or just plain "transportation."

A "sheaf of lettuce" is paper money.

"Rollers" means silver dollars.

"Third strike" is somebody or something totally useless.

"Sunday school fare" is small change.

"Struggle" is a dance.

The campus linguist also passed along a few more for those thirsting for additional knowledge along this line.

"Plush" is a "parlor gymnasium" where heavy "necking" is carried on.

"Smooch" is a kiss.

"Rassling" is another term for "necking."

"Agony" is a dance number.

—Exchange

Oregon," "The Nittany Lion" (Penn State), "The Red and Blue" (Pennsylvania), "The Panther" (Pittsburgh), "Princeton Canon Song March," "On the Banks of the Old Raritan" (Rutgers), "Trojan War Song" (Southern California), "The Cardinal is Waving" (Stanford), "Hip, Hip, Hip for Old Swathmore," "Saltine Warrior" (Syracuse), "The Olive and the Blue" (Tulane), "On Brave Old Army Team" and "Flight Away" (West Point), "Anchor's Aweigh" and "There's an Aggregation" (Navy), "Utah Man," "Vermont Victory" (Vermont), "Old Wabash," "Bow Down to Washington" (University of Washington), "Washington and Lee Swing," "Victory March" (Wesleyan), "Hail West Virginia," "Yard by Yard" (Williams), "Down the Field" (Yale), and a host of others.

Represented in the first volume are more than 100 of the foremost universities, among them the following: Alabama, Arizona, Amherst, Bates, Bowdoin, Brown, Bucknell, California, Carnegie Tech, Chattanooga, Chicago, City College of New York, Colgate, Colorado University, Colorado College, Columbia, Cornell, Dartmouth, Davidson, Denison, Dickinson, Drake, Fordham, Franklin and Marshall, Georgetown, Georgia Tech, George Washington, Gettysburg, Harvard, Hamilton, Hobart, Holy Cross, Heidelberg, Idaho, Illinois, Indiana, Iowa State, Kansas, Kentucky, Lafayette, Lehigh, Maine, Maryland, Michigan, Minnesota, Missouri, Nebraska, Northwestern, Notre Dame, Nevada, New York University, North Carolina, North Carolina State, Oberlin, Ohio State, Ohio Wesleyan, Oregon, Pennsylvania, Penn State, Pittsburgh, Princeton, Roanoke, Rutgers, Sewanee, South Carolina, Southern California, Stanford, Swathmore, Syracuse, Tennessee, Texas, Texas A. U., Tulane, U. S. Military Academy, U. S. Naval Academy, Utah, Ursinus, Union Vermont, Virginia, Wabash, University of Washington, Washington State, Washington and Lee, Wesleyan U., Western Reserve, West Virginia, Williams, Wisconsin, Wittenberg, Wyoming and Yale. One section devoted to women's colleges includes songs of Barnard, Bryn Mawr, Goucher, Radcliffe, Smith, Sweet Briar, Vassar, etc.

U. K. Summer School Teacher Writes Book

Dr. E. M. Coulter Publishes "The Civil War and Readjustment in Kentucky"

"The Civil War and Readjustment in Kentucky," by Dr. E. M. Coulter, teacher in the University of Kentucky summer school, has just been received by the Lexington Public Library.

The author, Dr. E. M. Coulter, is a member of the history department of the University of Georgia, and taught in the summer school here in 1924. He will be a member of the summer faculty the coming year and will teach several classes in history.

The new book describes the history of Kentucky in the Civil War, relating the history of the state to the final surrender to the north. The period following the war is also described in the story.

Much of the research work was done in the public library here by Dr. Coulter. Misses Florence Dillard and Carrie Hunt of the library, and Dr. Edward Tuthill, of the University of Kentucky history department, assisted the author in collecting data for several historic references in the book.

Texas University is giving special recognition to its Jewish students. A drive is being conducted on the campus to raise \$500,000 to build a house for them. In the proposed structure will be rooms for the students, an auditorium, and other features.

Men may wear anything; except tuxedos, even bathing suits, says an announcement of an informal dance at McGill University. The man degraded enough to wear a tux will be branded a parish, an outcast, a social outlaw, unfit to associate with respectable women and children.

When smart style is combined with quality... as it is in a Stetson... there can be no question as to the hat you should wear

\$30,000. in cash prizes

VANDY CONQUERS WILDCATS IN FIELD MEET

Kentucky Meets Tennessee Track Team on Stoll Field Tomorrow Afternoon

VOLS TO BRING FORMIDABLE SQUAD

Coach Jimmy Brady has announced his Blue and White track artists in the best of condition for their second meet of the season tomorrow afternoon on Stoll field. The Wildcats, after losing their opening session to Vanderbilt by an almost tripled score, have set to work with greater zeal and seem to think they can topple the visitors.

Vanderbilt had a wealth of material and the best the Kentucky boys could do was to land three first places and tie for one. The Knoxville aggregation has done nothing to speak of on the field this year but that can't prove they are inferior to the Blue and White. Coach Brady has had all his men working hard and every man has shown to perfection during the past week.

It looks as if Bill Gess will be able to account for two if not three firsts and Captain Ted Creech should surely annex the javelin heave. In West the Blue and White has a rather smart pole vaulter and broad jump man. These four men copped all of Kentucky's points against Vandy and should be Coach Brady's mainstay for tomorrow's event.

Kentucky has formidable representatives in all the other events and should be able to show up much better against the Volunteers than they did with the Commodores.

WANTED — Students' stenographic work. Reasonable charge. Call evenings at 4955. Susie Johns.—Adv.

Kentucky Team Returns From Disastrous Invasion; Lose All Games in South

Kentucky's Wildcat baseball nine returned from its recent rather disastrous southern trip without so much as one victory to appease it. The first foe met was Georgia Tech and the Wildcats lost two very close games on successive days. The first game went to Tech by a 3-2 score, Conn winning a pitcher's battle from Charlie Wert. Wert was touched for two home-runs in this encounter and Wildcat errors accounted for the winning margin. The second game was won by the Georgia boys, 7-5. Bach and McGeary pitched for Kentucky, while Gaston managed to hold the Blue and White safe throughout the contest. The opponents made numerous errors, but they managed to keep just a little bit ahead. The Wildcats' big inning was the fifth, in which five runs were scored. However, Gaston, bore down, and Kentucky failed to dent the home-plate another time.

The University of Georgia did little to console the University of Kentucky representatives when they proceeded to sock them for two straight victories, the first one 15-6, a track meet, and the second game considerably closer, 7-6. In the first game, Bach, Fry, McGeary and Wert saw action on the mound. Kain had an easy time with the Wildcat batsmen. In the second game, Kentucky's battery was Wert and Captain Ericson. In this game, the Wildcats made a tremendous ninth inning rally, but they fell short by just one run of tying

the county. Both of these games were very erratically played, since both sides were guilty of more than the ordinary amount of bobbles. Wert pitched two excellent games, and with just a little more luck, the Wildcats should have at least broken even on the trip.

Scores:
Kentucky vs. Tech
Kentucky 002 000 000—2 2
Georgia Tech 010 011 00x—3 4
Batteries: Wert and Ericson; Conn and Stevens.

Kentucky vs. Georgia
Kentucky 000 050 000—5 5 0
Georgia Tech 510 010 00x—7 11 6
Batteries: Bach, McGeary and Ericson; Gaston and Stevens.

Kentucky vs. Georgia
Kentucky 203 000 100—6 7 5
Georgia 070 120 50x—15 15 5
Batteries: Bach, Fry Wert, McGeary and Schulte; Kain and Johnson.

Kentucky 110 200 002—6 9 4
Georgia 201 013 00x—7 8 4
Batteries: Wert and Ericson, Schulte; Waller and Johnson.

Illinois Rained Out

Coach Bob Zupke Accompanies Team to Lexington

The baseball game scheduled Monday between the University of Illinois and Coach Pat Devereaux' Wildcat nine was postponed at noon after rain set in and turned Stoll field into a sea of mud.

Coach Devereaux was all set for the Illini and had high hopes of turning back the attack of Coach Carl Lundgren's nine. The Illinoises team put in a good practice at the field Monday morning but were forced to quit by the downpour.

Head Coach Robert Zupke, of the University of Illinois, and Fred Major, who will assist Harry Gamage in his coaching duties starting in September, accompanied the team to Lexington.

Yale Paper Oldest in Country
There now seems to be no doubt that the Yale Record is the oldest collegiate magazine in this country, since the Harvard Lampoon admits this fact is a recent issue. The Yale publication dates from 1876.—Ex.

TRACK TEAM TO FACE CENTRE APRIL 30

By some hook or crook a track team will meet a team coached by a former pupil when Coach Jimmy Brady takes his Wildcat aggregation to Danville next Saturday morning to display their wares against Coach Rice Mountjoy's Centre College cinder artists.

Several years ago Mountjoy was an outstanding track man at Kavanaugh High school at Lawrenceburg. In the same town James Brady was attending Lawrenceburg High school and gave promise of becoming a star. Throughout the season Mountjoy coached Brady in the pole vault and other events.

Mountjoy completed his high school career and went to Centre. Brady finished and came to the University of Kentucky, where he was a member of the track team and also its captain. Both men were star athletes during their college careers and will now send their respective teams against each other in competition, Saturday, April 30.

VOCATIONAL GUIDANCE

ENGINEERING

(CONTINUED FROM PAGE 3)

tion, "How did you happen to go into engineering?"

"Well," Mr. Hammond answers half whimsically, "I believe my keen interest in mining was first roused when as a small boy I was allowed an active part one summer in placer mining up in the mountains of California. A group of Chinese were at work up there by a mountain stream, washing out stray grains of gold from the gravel. They weren't making a fortune; perhaps they washed out a dollar's worth of gold apiece in a day. That wasn't enough to interest the average prospector or miner, but the Chinese worked away contentedly. And they let me help them. I've been interested in mining ever since."

"But you understand, of course, that I didn't choose engineering only because outdoor life appealed to me. The boy who goes into engineering merely because he likes the idea of a roving, adventurous life is likely to be disappointed, likely to wish he'd chosen some other line of work. A liking for outdoor life is essential in some kinds of engineering, but it isn't enough."

"Can you give me an idea of the qualities I should have?" you ask.

"You can't hope for success in any kind of engineering," Mr. Hammond says, "unless you have a genuine interest in the working of natural laws. If studying those laws bores you, keep out of engineering."

"Then you must be curious. Some of the happiest hours I've spent have been those when I've gone out of my way to trap over rough country examining geological formations."

"You must have imagination—be able to see a thing before it exists; you must be as much a dreamer as any poet or philosopher, with the practical ability to make your dreams come true. You must be an accurate thinker, and an honest one; you can't juggle with the forces of nature; if a man misleads himself or others, he won't succeed in engineering."

"Speaking of the value of honesty in engineering, I once offered a man an important position just on the strength of his honesty, his sterling character. When I was in charge of the mining operations of the Consoli-

Kentucky Kittens Conquer Massie in First Field Meet; First in All But Shot Put

The University of Kentucky freshman track team defeated the Massie High school team on Stoll field last Wednesday by the heavy score of 82 1-2 to 18 1-2. It was the first meet of the season for both teams.

The Kentucky yearlings took first honors in everything except the shot put. Crane of Massie, crashing through to ruin an otherwise almost perfect score. Hawkins, also of Massie, was second.

Sisk and Elrod captured both first and second places in the two sprint events. Sisk beat Elrod in the 220-yard dash, but Elrod, making a quick get-away beat his rival in the century event.

Don Williams won the 120-yard high hurdles event but he was disqualified when he knocked down too many hurdles. Maxon, of Kentucky, who ran second in this race was given credit for the victory.

Bruce Fields finished in front in the half mile run, but he was also disqualified when it was claimed that he ran into Owens, his teammate.

Rhodemyre had little trouble in the mile run and he was way out in front at the finish.

The results:

100-yard dash — Elrod, Kentucky, first; Sisk, Kentucky, second; Wilson, Massie, third. Time, :10 3-5.
220-yard dash — Sisk, Kentucky, first; Elrod, Kentucky, second; Wilson, Massie, third. Time, :25 3-5.
440-yard dash — Inman, Kentucky,

first; Johnston, Kentucky, second; Hawkins, Massie, third. Time, :56.
220-yard low hurdles — Williams, Kentucky, first; Maxon, Kentucky, second; McDonnell, Massie, third. Time, :32.

120-yard high hurdles — Maxon, Kentucky, first; Bomer, Massie, second; McDowell, Massie, third. Time, :18 2-5.

Broad jump — McLane, Kentucky, first; Bower, and L. Rhodemyre, of Massie and Kentucky, tied for second. Distance, 20 feet, 5 1-2 inches.

High jump — McLane, Kentucky, first; Wigglesworth, Kentucky, second. Height, 5 feet, 6 inches.

One mile run—C. Rhodemyre, Kentucky, first; Jewell, Massie, second; Bird, Kentucky, third. Time, :53 3-5.

800-yard run—Owens, Kentucky, first; Wigglesworth, Kentucky, second; Maxon, Massie, third. Time, 2:08 1-5.

Pole Vault—L. C. Rhodemyre, of Kentucky, first; Wigglesworth, Kentucky, second; Maxon, of Massie, third. Height—10 feet, 6 inches.

Shotput — Crane, Massie, first; Hawkins, Massie, second; Rhodemyre, Kentucky, third. Distance, 34 feet.

Discus throw—L. Rhodemyre, Kentucky, first; McLane, Kentucky, second; McDowell, Massie, third. Distance, 90 feet, 1 inch.

Half-mile relay—Kentucky (Inman, Owens, Johnson, Fields). Time, 1:40 2-5.

dated Gold Fields of South Africa and the British Chartered Company, I needed a good mine manager. I remembered a young engineer whom I had known as a boy. Though I was older than he, I had seen enough of him in the ordinary affairs of boyhood to know that he was unimpeachably honest; I had seen him in his home, and I remembered his fine ways with his mother and how willingly he assumed his full share of responsibility around the home. He was the kind I needed as mine manager—if he possessed the technical equipment. Though I knew he was practicing engineering in New Mexico, I knew little about his technical qualifications. But I pinned my faith to his honesty and found out about his qualifications in an unusual way.

"I merely asked him—and took his word without further investigation. I wrote and told him that I had thought of him because I knew just the square sort of a boy he had been; that I'd give him the position if he had the technical qualifications, and that I'd leave it to his judgment as to whether or not he had them."

"He decided that he had them and came on to South Africa and became one of my trustworthy assistants. Some years afterward when I had charge of the Guggenheim Exploration Company's mines, I sent for him and offered him another important position. After my resignation from that company, he became the consulting engineer. Not only has he made good as an engineer, but he has been most successful in a financial way. And his first big chance came because of that boyhood honesty of his—honesty in the broad sense."

"But let's get on with the other qualities of an engineer."

From Strong Start to Sure Finish
"You must like to create—whether you are civil engineer building a road across a continent, or a marine engineer designing a new engine for a ship,

or a mining engineer developing a copper mine that will turn a barren waste into a prosperous community. And you must have resourcefulness; you must be able to get results even if conditions are not favorable."

As a check on your listening, you sum up those essential qualities: "To make a successful engineer, then, I must be curious, I must have imagination, I must be an accurate thinker, I must be unfailingly honest, I must like to create, I must be ingenious."

Mr. Hammond nods: "All that. Better add initiative, too. The engineer must be ready to start things, ready to go ahead."

"Of course, comparatively few men are strong in every one of these qualities, but most successful engineers are strong in the majority of them and not altogether lacking in the others."

You're not sure how many of the essential qualities you have. But just for the time being, you'll cheerfully assume that you're the right sort to make a whiz of an engineer, and find out about the education needed.

"You were graduated from Yale, weren't you, and then you studied mining abroad?" you say to Mr. Hammond.

"Yes, I studied at the Royal School of Mines at Freiberg, Saxony; but in these days a young man doesn't need to go abroad for an en-

BILL GESS COPS TWO FIRST PLACES

The track team of Vanderbilt University defeated the Wildcats of the University by the top-heavy score of 84 1-2 to 32 1-2 in the first track meet of the 1927 season on Stoll field Saturday afternoon.

Vanderbilt, with a well rounded team, won 10 first places, tied one, and took off three second places. Kentucky won but three first places, tied one, and carried away honors in four second places.

Bill Gess was Kentucky's star, winning easily in the 440-yard event and in the half mile run, the respective times being 52 seconds and 2:03, very remarkable performances when the poor condition of the track is considered.

Ted Creech experienced little trouble in the javelin throw with a heave of 157 feet. West, of Kentucky, tied for first place in the pole vault with Nance, of Vanderbilt. West was second to Applegate of Vanderbilt on the broad jump.

Chesney, of Vanderbilt, was high point man of the day, taking first in both of the sprint events and running on the victorious relay team. Wilson, his teammate, was also a double winner, with first in the mile and two miles runs.

Officials of the meet were: Hinton, of Yale; Peak, Heber, and Brower, all of Kentucky, and Mountjoy, of Centre.

The results:

100-yard dash — Chesney, Vanderbilt, first; Nance, Vanderbilt, second. Time 10 2-5.

220-yard dash — Chesney, Vanderbilt, first; Bailey, Vanderbilt, second. Time :23 2-5.

440-yard dash — Gess, Kentucky, first; Hunter, Vanderbilt, second. Time :52.

Half-mile—Gess, Kentucky, first; Courtney, Vanderbilt, second. Time, 2:03.

Mile run—Wilson, Vanderbilt, first; Griffin, Kentucky, second. Time 4:50.

Two mile run—Wilson, Vanderbilt, first; Elliott, Kentucky, second. Time 10:47.

Shot put—James, Vanderbilt, first; Cecil, Vanderbilt, second. Distance 37 feet.

120-yard hurdle—West, Vanderbilt, first; Smith, Vanderbilt, second. Time 18 2-10.

220-low hurdles—Nance, Vanderbilt, first; Smith, Vanderbilt, second. Time :27 3-5.

Relay, one mile—Vanderbilt, first; Kentucky, second.

Broad jump — Applegate, Vanderbilt, first; West, Kentucky, second. Distance, 20 feet, 6 inches.

Pole vault —West, Kentucky, and Nance, Vanderbilt, tied for first. Height, 10 feet 3 inches.

High jump — Roberts, Vanderbilt, first; Roberts, Kentucky, and Ewing, Vanderbilt, tied for second. Height, 5 feet 8 inches.

Javelin—Creech, Kentucky, first; King, Kentucky, second. Distance, 157 feet.

Discus—James, Vanderbilt, first; Cecil, Vanderbilt, second. Distance, 118 feet 6 inches.

University Cafeteria

Three meals served, on the campus, every school day. Open forenoons for sandwiches, milk, chocolate, coffee, ice cream and candy.

Basement Administration Building

Everything's going to be all right

THAT'S the way P. A. talks to you in the bowl of a pipe. This great national gloom-chaser stabs the darkest clouds with a ray of sunshine. Buy a tidy red tin of Prince Albert today and see. Tamp a load of this friendly tobacco into your jimmy-pipe and light up.

Cool as a sub-cellar. Sweet as the breath of fresh-cut violets. Fragrant in the tin and fragrant as you smoke it. Never a tongue-bite or a throat-parch. So mild you can hit it up from sun-up to sun-down, yet with a body that satisfies completely.

There's more philosophy in a pipe-load of P. A. than in the average Doctor's thesis. No matter what brand you are smoking now, you don't know how much your jimmy-pipe can mean to you until you pack it with good old Prince Albert. Get started now.

PRINCE ALBERT

—no other tobacco is like it!

P. A. is sold everywhere in tidy red tins, pound and half-pound tin humidors, and pound crystal-glass humidors with sponge-moistener top. And always with every bit of bite and punch removed by the Prince Albert process.

VOCATIONAL GUIDANCE

ENGINEERING

(CONTINUED FROM PAGE SIX)

gineering education. He can get the best there is available right here in his own country.

"You'll do well to include one or two years of cultural training in your college education. In the engineering course at Yale, a student is given one year of cultural education, one year of general engineering, and two years of special engineering.

"I shouldn't advise you to spend more than four years, or five at most, in college. In those years, you'll get the rudiments. The rest is up to you; as you work, you must study on, along both technical lines and cultural lines. Nor should I advise the prospective civil or mining engineer to go abroad to study. His work will probably take him into foreign countries, and he can get his first-hand knowledge of foreign countries then, without loss of time."

"But meanwhile all that I can learn of foreign countries while I'm in high school and in college will help me, won't it?"

"Yes. Learn all you can, and go on learning all through life. The more you know of other peoples, of their laws and customs and ways of thinking, the better off you'll be. Don't be afraid to study history and government and art and philosophy and languages and all the other subjects included under the term of general culture. All those things will help you in engineering. Lack of them will hinder you, keep you from going up. You must be able to meet all kinds of men understandingly, and to hold your own among men of broad culture and great influence.

"Another thing. You must be able to speak and write your own language well. The engineer has to explain his plans and his results in order to get cooperation. If you're a poor talker or a poor writer, you will find yourself badly handicapped.

"Study mathematics and science to make yourself an accurate thinker. In those subjects you can't fool yourself with slipshod thinking, and you'll develop habits of thought that will help you throughout life. In my opin-

ion the best foundation a boy can get for any line of work—law or business or whatever he may choose—is a scientific education.

"If I can crowd two or three extra subjects into my high school course, are there any special ones you'd recommend?" you want to know.

"Every engineer should know something about business," answers Mr. Hammond. "If you can study book-keeping and banking in high school, and perhaps get some practical experience in them through summer vacation work, you'll be wise to do that."

"In these days, the man who knows both engineering and business has a chance to rise to unusually desirable positions. If I were a young man, I should take what is called an administrative engineering course—that is, of course where you get a broad knowledge of engineering together with a comprehensive business course. A man with such training if he is anything of a leader, is he has organizing ability, will some day be the head of a great industry."

There's a glimpse of the future in engineering!

But you've got to work to win it. It will be a long climb.

"I've got to work my way through college," you say.

Others Are Working Their Way

Mr. Hammond's quiet smile is somehow reassuring. "It isn't easy, but it can be done," he tells you. "I know a good many boys, engineers in the making, who are working their way through Yale and Harvard and the Massachusetts Institute of Technology. They're developing resourcefulness and showing a determination that will recommend them to employers. If you're such you'll need the health and the qualities you'll need for success in engineering, you needn't be afraid of having to work your way through college.

"Better to work your way through than to give up engineering or to go into it without training. It's hard for the man without a technical education to work up in engineering. Comparatively few do. Yet, it's not impossible. One of the finest fellows and best engineers I've known worked up without college training.

"He came to me years ago when I was in charge of mines in Mexico, and asked, 'Are you the manager? Have you a position for me?'"

"The young fellow looked pretty much the tramp; yet there was something likable about him and I asked what he could do. He told me that he had been left stranded about 100 miles from the mine by unscrupulous promoters who had engaged his services as an assayer. It developed that he had no technical education beyond a knowledge of assaying. But he seemed alert and intelligent, and I found a place for him. Started him on a small salary.

"Soon I found that his knowledge of his work was increasing out of all proportion to the experience he was getting. I discovered that he was putting all his spare time in on study, working late into the night, perfecting himself in the details of work far outside the province of his own job.

"When I left the mine to return to the United States, he was appointed my successor.

"Later, he worked for me as assistant manager of a California mine under my charge; and then, upon my recommendation, was appointed superintendent of an important mine in Idaho. That mine is today the greatest silver-lead mine in the world, and to him is due much of the credit for its success. When I went to South Africa, I took him with me as chief assistant. He remained with me for several years, when he returned to this country. Before his untimely death at the age of forty-five, this man who had built up a fortune of more than a million dollars by his investments in mining properties and had equipped himself technically so well that he held a place in the front

rank of the engineering profession. "But only a hard worker of rare ability could accomplish so much, handicapped as that boy was in the beginning. The average boy shouldn't count on being able to climb high without technical training."

Well, you'll earn that training. You wonder how long it will take to get to earning a good living after you've earned your training.

"At the start, look for the place where you can learn most, not for the one where you can earn most," Mr. Hammond advises. "Perhaps in mining engineering you will start as an assayer at \$150 a month. Perhaps in another line of engineering you will get more; perhaps not. But what you want in any line is a maintenance salary and a chance to learn."

"Of course, if you marry at an early age, you may have to put the chance to earn above the chance to learn. But if you marry a girl who is a thinker and a comrade, as engineers have a way of doing, she won't want you to sacrifice too much of your chance to learn."

"As you work on up, plan that after you've saved something for a rainy day you'll take as a large part of your salary an interest in the property you're developing. Many competent mining engineers who have done this have acquired, while still comparatively young, independent incomes that have enabled them to return to the comforts of civilization as their families are growing up.

"But no dream of making a fortune should lure a boy into the work. In the engineer's younger years, he must give up so many of the pleasures of civilization, must face so many hardships and encounter so many grim chances that only genuine fitness for the work and a real love for it will carry him through to success. To the engineer, achievements must mean more than money.

"Every man, however, must consider the financial side. The competent engineer may look forward confidently to earning a good living."

"The engineer who wants a larger salary can get it—by the simple process of making himself indispensable. The well trained man who is a worker can do that. Of course, I don't mean that a man should work so hard he's likely to go stale. Back in the old days in Africa, I sometimes went into the Johannesburg offices over the week-end and drove out the group of young engineers I'd find in there working over blue prints.

"See here, I'd say to them, 'on Monday morning I'll be wanting to discuss plans with you. I don't want to find you dull from too much work. And I'd drive them out for a tramp, or take a crowd of them home for luncheon with me.

"Just the same, that group of keenly interested, ambitious workers made the best engineers. There were others whom I never had to drive out of doors; they were the first to stop on Saturday noon, and the last to appear on Monday morning. Good men, some of them; but they didn't make themselves indispensable—and they didn't forge ahead."

Big Opportunities
As Mr. Hammond pauses, you go back to one of his points: "You spoke of mining engineers who acquired a financial interest in the property they were developing," you remind him. "I'd like to know more about that. It sounds like one of the big opportunities in the work."

"It is. The mining engineer is in an excellent position to buy interests in the best mines. The wise man does it. Frequently, the engineer has the chance to discover and open up a new mine. He risks his reputation in the report that he makes. If the mine is improperly developed or if the business side is poorly managed, the engineer's reputation will be damaged. He is justified in stipulating that he shall own stock in the mine, and that he shall have a controlling voice in the technical management.

"When an engineer has established a reputation for reliability, the fact that he owns an interest in a mine gives confidence to the public. The engineer should never forget that he is serving the public, not the promoter. That is a matter not only of the confidence of the public, and the promoter must come to you whether he likes you or not—promoters who had precious little liking for me personally have come to me simply because the public trusted me.

"A mining engineer who knows both the technical side of his work and the business side is in a position to reap high financial rewards. But after he has provided for his family, money is one of the lesser satisfactions.

"The engineer is a doer. His greatest pleasure is in achievement. He may discover some chemical secret that will revolutionize an industry and bring added prosperity to many. He may span a South American canyon, bringing the pieces of his bridge into the wilds packed on muleback, building under difficulties but taking care that every piece is set in the right position. In the end, he sees that his work is good, that it will serve through long years to come. What pleasure greater than that?"

The pleasure in doing! That's the biggest reward of the mechanical en-

gineer who is improving the pattern of a railroad locomotive, say; or of the civil engineer who is digging the tunnel through which the locomotive will eventually whistle its way; or of the electrical engineer who is working out the best method of "electrifying" the railway system. They're doing, achieving.

"There are plenty of things to be done," you reflect. "Engineering can't be overcrowded, as some professions are."

"No," says John Hays Hammond, "I think there will always be a demand especially for engineers of the administrative type. The whole future of the world lies in the development of industries; every year brings new industries—and new demands for competent engineers. The engineer of tomorrow will come into greater importance than the profession has ever known."

"Moreover, engineers will come to play a greater part in the affairs of government, in statecraft, in the adjusting of internal relations than they ever have before."

"The engineer of broad experience is particularly well fitted to serve in public affairs. His training and the exactness of his work have made him honest, accurate, keenly analytic, resourceful, aggressive, and fearless. He's an organizer. He understands human nature, for he has had to learn how to handle men. And many an engineer has learned statecraft in far countries—in China, India, Siberia, South America. Through his work, he has gained the knowledge and perspective that will enable him to act wisely in affairs of government.

"In the past engineers have been inclined to keep out of public affairs. Engineers are straightforward men, men of action; they are irked by the delays and roundabout methods that are sometimes expedient in public affairs. But we're beginning to recognize government as a vast engineering undertaking, and I think engineers are beginning to realize that the well trained man must not refuse to help in affairs of state."

Mr. Hammond himself does not refuse. That you know. Back in 1912, he was president of the Panama-Pacific Exposition Commission to Europe; the year before that, he had served as special ambassador and representative of President Taft at the coronation of King George V.; in 1914-'15, he was chairman of the World Court Congress; in 1922-'23, he was chairman of the United States Coal Commission. Varied and valuable services given to the public by a mining engineer of broad experience!

You'll not be likely to forget that engineers should lend a hand in public affairs. The man who told you so practices what he preaches.

You get up to go. Reluctantly. For an hour or more, you've been something of a mining engineer yourself—discovering in John Hays Hammond a mine information and inspiration. You hate to leave. But you clutch at your manners and get up. Bad business, wearing out a welcome.

If you've done so, Mr. Hammond does not let you know it. He detains you with a remark that shows he has observed your glances at the hundreds of framed photographs that hang upon the study walls.

"I work among friends up here, you see," he says; and then, because you betray your keen interest, he takes you on a tour around the study so that you may have a closer look at those friendly photographs—autographed, many of them, with a personal word for John Hays Hammond.

Men of Action

The friends of an engineer, the friends—many of whom are still living, some of whom have passed on—that Mr. Hammond has won in a long and active life; President Coolidge, Mussolini, Clementine, Lord Bryce, Lord Gray, Alexander Graham Bell, Thomas A. Edison, Luther Burbank, Hiram Maxim, Charles M. Schwab, Samuel Gompers, Mark Twain, Ibañez, Richard Harding Davis.

"Yes, I've known personally all of them except one," Mr. Hammond tells you with a reminiscent little smile. "I didn't know personally Abraham Lincoln—his gesture directs your attention to the large photograph in the center of a group—but his son, Bob Lincoln, gave me that photograph. General Grant, here, I knew in my boyhood."

You find seven presidents of the United States among those photographed friends; and many others who are outstanding friends; and many others who are outstanding, each in his own calling: General Pershing, Colonel House, Andrew W. Mellon, Henry Ford, Conan Doyle, John Drew, Rider Haggard.

You linger a moment in front of the photograph of Cecil Rhodes, "the Empire Builder" and the founder of the Rhodes scholarships—Mr. Hammond was his consulting engineer at one time, his friend at all times.

Near a photograph of Rudyard Kipling, hangs a framed copy, hand-written, of Kipling's famous poem "The Recessional"—a copy written, so you learn, by Kipling's father and signed by Kipling himself. Mr. Hammond tells you quietly that he was breakfasting with the Kiplings on the

morning when the mail brought Mr. Kipling a request for a poem that should add to the celebration of the Queen's diamond jubilee. "The Recessional" is that poem. Hanging next to "The Recessional" is a poem written by Kipling as a Christmas present for Mr. Hammond in 1898. It is written in Mr. Kipling's handwriting and was said by John Hay to be one of his best poems.

The friends of an engineer: famous writers, rulers and inventors and financiers, generals and statesmen, actors and labor leaders. You're getting another glimpse of the future in engineering. Oh, you won't let yourself be led astray by too highly exalted ideas of what may be possible for you. Yet it's good to know that the doers of the world give their friendship to the engineer.

"You'll want to see this photograph," Mr. Hammond is saying. "This is James Marshall, the man who discovered gold in California." James Marshall—fearless pioneer—the sort the engineer must be. You put something of that thought into words.

"Yes," Mr. Hammond says, "in the future, many an engineer must work in still more remote wild places—clear

down in South America, in Africa, in Siberia—where many discoveries and developments are yet to be made. More than ever, he must be the fearless pioneer.

Then Mr. Hammond adds a final word of caution: "No boy should take up engineering without being sure he is well qualified for the work. The world needs good lawyers, good doctors, good business men. It doesn't need mediocre engineers. Follow the line for which you are fitted. But if engineering is your work, you can be sure of a chance to serve as the pioneers have always served the world."

As you pass through the big reception hall on your way out, the great African lion seems to eye you a bit more warmly. You want to stop and ask him:

"Old fellow, do I look like a scrapper?" Will I ever be a fighter in far places? Or perhaps in near? Do you think I have in me the makings of a first-class engineer?"

But you don't stop. Good old lion, but he can't tell you. You must figure things out for yourself. And thanks to John Hays Hammond, you have a good start.

U. K. DEBATERS TO MEET SEWANEE

Hanratty and Skinner Return From Meet at Oxford, Miss.; Tell Experiences in Flooded Area

CALL MADE TO ORATORS

The University debating team composed of A. K. Ridout and W. H. Hanratty will meet a team from the University of the South in a debate this evening at 8 o'clock in the auditorium of the Education building. The subject of the debate will be "Resolved That Organized Industry Should Accept the Five Day Week."

Mr. Hanratty has recently returned from Oxford, Miss., where he and W. E. Skinner met the University of Mississippi debaters in a split team contest. The subject was, "Resolved that Organized Industry Should Accept the Five Day Week." Owing to a misunderstanding of the subject for contest, each team had prepared to discuss a different phase of the question. In order that no one might be handicapped the contest was converted into a split team debate. The decision was by audience.

Holloman of Mississippi and Hanratty of Kentucky, defending the affirmative, won the decision of the audience over Satterfield, of Mississippi, and Skinner, of Kentucky. The audience was greatly pleased with the contest and generously offered to bring the Kentucky team back to Oxford again next year, all expenses paid, for another contest. It was the first loss for Satterfield, of Mississippi, in his debating career.

Tryouts for Orators

Professors Sutherland of the department of public speaking announces tryouts for the Southern Oratorical Association's meet at the University of North Carolina, Chapel Hill North Carolina, next month, will be held Monday evening in the Little Theater beginning at 7 o'clock.

Mr. Sutherland wishes it to be known that the university will not officially enter the oratorical contest fostered by the Better America Federation of California or the "Know the South" oratorical contest sponsored by the Nashville Banner and explained in the last issue of The Kernel. However, should any student of the university wish to enter one of these contests Mr. Sutherland can furnish information concerning it and will assist him in preparing for it. In such an instance the student would pay all expenses incurred in participation.

Caught in Flood

W. H. Hanratty, one of the Kentucky debaters in the meet with Mississippi, told some interesting incidents of the trip. Their progress to and from Oxford was hindered by the flood now raging all along the valley of the Mississippi. The flood is one of the greatest the valley has ever experienced and has caused much damage and suffering along the entire length of the river. The Kentucky men, after finishing their debate in Oxford, found that the rising waters had caused a washout on the line on which they had traveled and had cut off their return. They proceeded to New Orleans for a short stay. In the night a terrible rain fell and on arrival in New Orleans the travelers found the city flooded under two or more feet of water.

The flood, so the Kentucky men were told, was the worst that the veteran city had ever seen. Whole business and residential blocks were inundated. Mr. Hanratty stated, however, that all this was not without its amusing features. One could not

help but be amused at the sight of residents of New Orleans receiving their groceries from boats while they kept house on the roofs of their dwellings. After a short stay in the city the men were able to get a train back to Kentucky.

ANNUAL INSPECTION TRIP IS TO BEGIN APRIL 24

(CONTINUED FROM PAGE ONE)

ing the trips will again be optional, some of them will go to the Edgewater Coal Mines and the rest to the cement plant. In the afternoon, they will go to the Ensey works of the Tennessee Coal Iron Railway Company.

Alumni to Entertain

The Birmingham Alumni club will entertain with a banquet on Tuesday night. They will take a special pullman to Atlanta on Wednesday night and on Thursday morning they will take a bus to Stone Mountain and will also take a general sight-seeing trip through the city. That afternoon, they will go to Copperhill, Tenn., where they will visit the copper smelter of the Tennessee Copper Company that night. Friday morning they will go to Ducktown to visit the underground copper mines of the Tennessee Copper Company. They will leave for Knoxville Friday noon and arrive there that night. They will go to Mascot, Tenn., Saturday. Part of the group will visit the industrial plants in Knoxville while the other part will visit the mines and mills of the American Zinc Company. Saturday night, they will leave by special Pullman and arrive in Lexington Sunday morning. About twenty students, miners, metallurgists, civil engineers and geologists, are expected to take the trip.

Others Go North

The seventh annual northern junior inspection trip of the College of Engineering which will begin Monday, April 25, and which extends to April 30 will be conducted by Professor Robert D. Hawkins.

A special bus has been chartered for the trip and the juniors will leave for Cincinnati on Monday and will visit the Proctor and Gamble Company that afternoon. They will go to the Lukens Company Tuesday morning and to the Triump Electric Company in the afternoon. The Cincinnati Alumni club is to entertain them with a banquet at the Hotel Alms on Tuesday night. The engineers will leave for Middletown, Ohio, on Wednesday. While there they will visit the American Rolling Company, the National Cash Register Company and the Miami Dam. Friday morning they will visit McCook Field (national field) and on Friday afternoon, they will go to Dayton where they will go to see the Duro Pump Company. They will spend Saturday night in Hamilton. On Saturday morning they will visit the Hoovers, Owen Rentschler Company and a large paper mill there. They will leave for home about 1:30 or 2 o'clock.

Y. W. C. A. CONFERENCE WILL BE HELD HERE APRIL 29

(CONTINUED FROM PAGE ONE)

Student Secretary will be here during the conference. The program for this conference has been tentatively arranged and will include several addresses by prominent speakers, group and round table discussions, a play, a picnic, and a tea.

The new advisors of the Y. W. C. A. for the coming year have just been elected and include Mrs. Bart Peak, Mrs. J. E. Rush and Mrs. L. L. Roberts, all of whom were elected for a period of three years.

Other advisors include Mrs. Bureau, Mrs. Koppas, Mrs. I. D. Best, Mrs. Frank McVey and Dean Blanding.

DELEGATES HERE FOR CONVENTION

(CONTINUED FROM PAGE ONE)

Experiment Station, University of Kentucky, on "After Graduation."

Students to Speak

After taking luncheon at the university cafeteria the conference will reopen with various representatives speaking on the problems of the college and the student. University of Georgia representative on "Problems of Junior College Athlete"; University of Tennessee representative; "Define and Evaluate Campus Public Opinion"; University of North Carolina representative; "Does the Minority Control Campus Life?"; University of Virginia representative, "Is the Student Government Really Desired by College Students?"

Saturday morning will probably be spent in open discussion and general or unfinished business, at which time the elections of officers and choice of the next meeting place will take place.

Approximately twenty-five colleges and universities of the South will be represented. Among them are the University of Alabama, Alabama Poly Technical Institute, Clemson College, University of Florida, Louisiana State College, University of Maryland, University of Mississippi, Mississippi A. and M., North Carolina State College, University of North Carolina, Sewanee, University of Tennessee, Tulane University, Vanderbilt University, University of Virginia, V. P. I., Washington and Lee University, Davidson College, University of Richmond and Emory College.

Will See Ball Game

Following the noon luncheon the conference representatives will be the guests a the baseball game between University of Kentucky and Notre Dame University. Friday night the delegates will be guests of the Junior class at the Junior Prom. During their stay at the university the delegates are guests of the various fraternity houses.

BANQUET OF COMMERCE CLUB IS WELL ATTENDED

(CONTINUED FROM PAGE ONE)

university and especially the Commerce College. Mr. Manning showed the student's problem in a different light when he talked on the subject of "A Business Man's Point of View."

Other speakers of the evening were President McVey and Leroy Miles, senior in the College of Commerce.

Officials of the Commerce Club are: president, Leroy Miles; vice-president, Lloyd Walker; secretary, William Walton; treasurer, John Wheeler.

The Board of Commerce officers are: president, C. L. Thompson; vice-president, L. B. Shouse, Sr.; secretary, Ed Wilder; treasurer, W. H. Courtney.

Freshman—Elizabeth Cramer, Louisville.

Sir George Paish Says "World Today Is Unit"

Noted English Financier Tells Students No Country Can Be Self Contained

"The statesmen of the world do not understand the world of today," said Sir George Paish, noted English financier, at the university convocation Tuesday morning at the third hour in the new gymnasium. The subject of Sir Paish's address was "America As a World Leader," and a large crowd of students and faculty members were present to hear him.

Rev. T. C. Ecton, of Calvary Baptist church gave the invocation, after which President McVey introduced the speaker of the morning.

Sir George pointed out that the world has become a unit of production. He said that no country of the world could be self contained, and that the prosperity of one country was dependent on the prosperity of another. "Unless the income of a country is maintained, the national debt can not be met," he said. He showed that the world today is a unit, such as it was not a hundred years ago, and illustrated this fact with examples of the effect the new inventions have had on world progress.

The speaker came to America to tell the people here that Europe is looking to them to lead the foreign powers to a broader state of mind. He contends that when the states of the world reach that state of mind, there will be no more war, and poverty will disappear.

The Reverend Dr. Combs pronounced the benediction.

Robbery Frustrated

Professor Bureau Seizes Man Searching Through Locker

When Prof. E. A. Bureau, of the College of Engineering, went to his locker in the university gymnasium after attending a gym class last Tuesday afternoon he saw a man searching through his clothes.

Like most other men, Prof. Bureau objects to unannounced inspection of his diurnal raiment. He grabbed the intruder and with the help of others present managed to impress him with the fact that flight was impossible. The police were summoned and the man, who gave his name as H. H. Rees, 33 years old, of Fort Lauderdale, Fla., was arrested on a charge of petit larceny.

MAY DAY CELEBRATION LOOMS IN THE OFFING

(CONTINUED FROM PAGE ONE)

paign. They have "Pussyfooted" all the thrill out of the May Day contest.

One of their most unreasonable and justly maligned rules is that no man can vote more than once. The arbiters of the ballot boxes, make no exceptions to this rule—even in the case of the love-lorn lad who would triple himself to give the coveted honor to the lady of his affections, or the zealous freshman who would double the chances of his room-mate's girl.

In spite of the fact that the tyrants of law and order have done their best to take all the excitement out of the big game of the May Day elections, something unexpected might occur on Wednesday at the polls, so it would be well if all male students of the University of Kentucky would take advantage of their franchise. (No I am not a student of American Government. Just trying to make an expression.)

DEAN TURCK ACCEPTS PRESIDENCY OF CENTRE

(CONTINUED FROM PAGE ONE)

which will take effect August 31. He will assume his new position September 1.

The dean is one of the youngest men to ever be selected president of the institution. He will remain here until the beginning of summer school, when he will go to Columbia University for a six week's study of political science.

The dean-elect has been dean of the law school of the University of Kentucky since 1924, when he took the position formerly held by the late Judge W. T. Lafferty. Since he has been head of the school, it has been built up greatly. Last year the school moved into the newly renovated building, which it now occupies.

Dean Turck is a member of the Kentucky, New York, Louisiana and Tennessee bar associations. He is very prominent in civic and church affairs in Lexington, having occupied the pulpits of several of the churches at different times. He is a member of Sigma Nu social fraternity, a member of Phi Beta Kappa, honorary scholastic fraternity, and Phi Delta Phi, honorary legal fraternity. For several years he has been a national officer of Square and Compass, national collegiate Masonic fraternity. He is a member of the Lexington Rotary Club, a director of the Lexington Automobile Club, and an elder in the Second Presbyterian Church.

Dean Turck received his bachelor of arts degree at Tulane University in 1911. He received the master of arts degree at Columbia University in 1912. In 1913 he secured the bachelor of laws degree from that institution, also. Until 1916 he practiced law in New York City, after which he returned to Tulane as professor of law. During the World War he did wartime work in Pensacola, Fla., and South Carolina. In 1920 the dean assumed the positions of professor of law and secretary of the law school at Vanderbilt University, which positions he held until coming to the University of Kentucky.

Miss (to hotel clerk)—Someone's been tampering with the keyhole in my door. It's out of order.

Clerk—I'll look into that tonight.

SKATING DERBY WILL BE HELD

Plans for Inauguration of Sport Feature Are Nearing Completion; Interest of Students Grows

GIVE HANDSOME PRIZES

Roller skating seems to be quite the fad, now that Spring is with us once again, and the intra-mural athletic department, noting that fact, announces the first annual Roller Skating Derby, which, if plans work out well, will be run off in the near future. Mr. Potter, who is sponsoring this work at the University of Kentucky, is in charge of all preparations, and he gives out the announcement that the Winslow avenue course, which will be the scene of these races, is fast getting into the best condition.

Races for all classes of students will be included in the lists of events. There will be 100, 400 and 800 yard races open to men, and 100, 200 and 400 yard races open to women. Fraternities and sororities will get a chance to annex handsome trophies in the relay events. Fraternity and sorority teams will be composed of four skaters, each covering 100 yards of the relay course.

Dean Sarah Blanding, dean of women, has sanctioned the events, and urges the co-eds of the university to compete. Ted Creech, the pride of the Sigma Nu's, has offered his valuable services as official announcer, while it is rumored that some of the prominent athletes on the campus will run off a feature race, which should be very entertaining to say the least. Any student is eligible to enter. It is rumored that certain groups have gotten wind of the Derby already, and have started practicing for the various events.

Mr. Potter will receive entries at his office in the gym. Some very handsome trophies are offered to the winners in each event. These cups will be displayed in the "K" shop window in the near future.

At the University of Illinois, the only university at which the skating derby has become an annual affair, something like 3,000 students took part in the last running. This event promises to be very entertaining, is a good sport, and offers a splendid chance for some one to win a handsome prize. If Illinois can get 3,000 students out, the University of Kentucky should have a good sized entry list in the Derby. Sign up at once with Mr. Potter.

Plan Dinner

Faculty and Seniors Dine Together on May 4

The first dinner for the faculty and seniors of the College of Arts and Sciences will be held Wednesday, May 4, at the Phoenix hotel at 6:30 o'clock.

Dean Paul Boyd, of the Arts and Science College, will act as toastmaster. Dr. Frank McVey will introduce the speaker of the evening, Frank W. Chandler, Dean of the College of Liberal Arts of the University of Cincinnati, who will speak on "Our Passion for Painless Education."

A committee of students will assist a committee of the faculty in the sale of tickets to members of the university staff, graduate students and seniors which begin Saturday, April 23.

Dean Sarah Blanding, Dr. McFarland, Dr. Vanderbush, Dr. Shrago, Miss Margaret King, Marguerite McLaughlin, Ida Lee Turner and Prof. B. P. Davis composed the faculty committee.

Honorary Agricultural Societies Hold Pledging

Phi Upsilon Omicron, Alpha Zeta and Block and Bridle Select Members

Phi Upsilon Omicron, honorary home economics sorority, and Alpha Zeta and Block and Bridle, honorary agricultural fraternities of the University of Kentucky, held their spring pledgings Friday evening, April 8, at the pavilion of the College of Agriculture.

The pledges of Phi Upsilon Omicron are: Mary Stuart Newman, and Dora May Duncan. The members of the active chapter are: Sara Curle, Josephine Skain, Catherine Brewer, Ann Becker, Elizabeth Aaron, Miriam Hyman, Gertrude Griffin, Mary Allen Steers, and Irene M. Morgan.

The pledges of Alpha Zeta are: Ralph Woods, Grant Maddox, James Walters, Hugo Hesson. The members of the active chapter are: Watson Armstrong, Lowry Caldwell, George Insko, H. B. Brown, W. O. Blackburn, and Mr. Scott.

The pledges of Block and Bridle are: Grant Maddox, James Walters, Armon Berry, Perry Summers, N. J. Howard, Marion Garnett, B. F. Fontenberry. Members of the active chapter are: George Insko, Lowry Caldwell, H. C. Brown, W. O. Blackburn, Marion Goff, R. C. McClure and James Bondurant.

UNIVERSITY PROFS GO TO K. E. A. CONFERENCE

(CONTINUED FROM PAGE ONE)

afternoon for ten minutes on "Meeting Individual Differences" before the department of fine arts this afternoon on "How the University May Cooperate in Music Education."

Professor C. C. Ross, of the university, will address the kindergarten department this afternoon on "Personality, Its Growth and Development." Dr. J. B. Miner, head of the department of psychology of the university, discussed "Ways and Means of Recognizing the Abilities and Interests of Pupils" Thursday afternoon before the vocational education department.

President Frank L. McVey will speak again this afternoon to the section of Agricultural education on "Some Social and Economic Problems of Agriculture." Professor Julia Hurd, of the home economics department, will preside over the section of home economics education. Dr. Edward Wiest, dean of the College of Commerce, will speak before the commercial education section.

Tennis Tournament

Co-eds Will Have Opportunity to Demonstrate Net Ability

A tennis tournament for women will be held on the university courts under the auspices of the W. A. A., this week beginning May 2, according to an announcement made by the tournament manager this week.

Anyone wishing to enter may sign on the blanks on the bulletin boards in the various buildings, or see Katharine Best, manager of the tournament. The tournament will be arranged on the usual elimination plan. A consolation tournament will also be held for those eliminated in the first round play.

NOTRE DAME TO PLAY 'CATS HERE

(CONTINUED FROM PAGE ONE)

been inactive, so far as the playing of their schedule goes, since their return from the disastrous jaunt in the Southland. The southern trip was a complete unsucess in winning games, but it will probably benefit the teams immensely before the season is half over, by showing to Coach Devereaux the faults and lacks of ability of a few individual members on the Wildcat aggregation. But these will be corrected in some measure, as tomorrow's lineup will show.

Notre Dame will probably find Schulte behind the plate, with either McGary or Wert delivering the slants. Captain Ericson will see how he likes the landscape around first base, by playing that position. Blasingame will play second, with Gibb and Crouch, respectively cavorting at the shortstop and third base terminals. The outguards will be patrolled by Anderson, Layman and Franceway.

Registrars of Kentucky Elect Cannon President

Approximately Seventy-five Persons Attend Concluding Meeting of Institute April 8

Mr. E. H. Cannon, of the faculty of Western State Teachers' College, was elected president of the Kentucky Registrars' Association and Miss Adelaide Gundlach, registrar of Berea College, was elected secretary of that organization at a meeting held Friday, April 8, in conjunction with the National Registrars' Institute, which closed its annual session on that day.

On Friday afternoon Mr. Beetham, retiring president, made his farewell speech before an audience of approximately seventy-five persons. At the same time plans for changing the name of the organization were discussed, but no definite action was taken. Round table discussions of problems which confront the modern registrar were held under the leadership of Mr. Gillis and Dean Boyd, of the University of Kentucky, Frank L. Rainey, of Centre College and Miss Margaret Kirwan, of the University of Louisville.

The fifth annual sessions of the Registrars' Institute sponsored by Mr. Gillis, closed with a banquet Thursday night. The meeting this year was one of the most successful ever held in the history of the institution. It was attended by representatives from colleges in eighteen different states.

Statistics from the Y. W. C. A. Employment Bureau of the Ohio State University show that of the 221 co-eds who obtained positions through this bureau only 12 proved inefficient.

When Is a College Not a College?
At the new John Wesley College, in Columbia, Ill., dances, athletics, and fraternities are barred, and the use of liquor and tobacco is tabooed. Is this a college? If it is, who would want to attend it?—Ex.

"Scientists say that some musical notes prevent sleep," said the professor.

Student—So can certain promissory notes, professor.—Ex.
